

1500 watt power station

Why should you buy a explorer 1500 power station?

The Explorer 1500 offers reassurance during outages from winter storms and summer blackouts, and even after 800 charging cycles, it still maintains 80% of its battery capacity. Whisper-quiet and fume-free, Explorer 1500 power station is the perfect outdoor companion and home emergency backup solution.

How long does a explorer 1500 power station last?

Safety Precautions for Operation: To conserve energy, the Explorer 1500 portable power station is designed to automatically shut off after 12 hours of continuous use if the power draw is below 25 watts, which helps protect the device and conserve battery life.

How many watts can the explorer 1500 charge?

A: The Explorer 1500 can charge/power devices that operate at less than 1800 watts and the total wattage of all connected devices should also be under 1800 watts as well. If the power requirement exceeds this limit, the Explorer 1500 will automatically shut off. Please check your device's specifications before making a purchase.

How much power does a Yeti 1500x use?

The Yeti 1500X is the bridge between emergency home backup and off-grid power for camping, tailgating, or remote excursions. We ran it from 100% down to 0% using a 459-watt load over 3 hours and 11 minutes. For reference, that's like running four refrigerators, continuously, for the same amount of time.

How much does a portable power station cost?

When choosing portable power stations for this list, we wanted to offer a variety of choices that will fit both your needs and your budget. Small, basic power stations start around \$500, but larger models can cost over \$3,000. We included options at both ends of this range, as well as a few middle-of-the-line choices.

How many devices can a explorer 1500 power?

Portable power station with 3600 peak watts/1800 running watts can power 7 devices simultaneously for most power needs. The Explorer 1500 offers reassurance during outages from winter storms and summer blackouts, and even after 800 charging cycles, it still maintains 80% of its battery capacity.

We also subject larger portable power stations to a 1,500 watt load for 15 minute, examine the USB ports for charging protocols supported, and inspect the unit's sine wave inverter under a load.

New Lower Price! The Goal Zero Yeti 1500X is one of our best-selling large portable power stations. It provides an ideal 1,516 Watt Hours for any project, indoors or out. Powerful enough to backup home circuits, but portable enough to take to the job site or integrate into a van build.
