1976 xl350 power system

Good morning gang. Been away for a minute, but back at it again. I hope there's someone out there with some solutions. Here's the thing; 1976 Honda XL350 compression at around 136. Timing is set (statically). Good spark. WILL NOT START!! This is the second carburetor (same style) I've tried on th...

Back in 1975 in our small town of 450 in SE Iowa we had three SL-350s, one XL-350, one CB-350 and one CL-350. Oh and a off-brand Yamaha 350 two stroke dirt bike! Lol I remember that XL-350 would pull the coolest 1st to 2nd gear power shift wheelies! We were some bad dudes when we all got together in the evenings and weekends to ride!

Al Baker set up the oil cooler and suspension system. Years later Rick Doughty did a full restoration on the bike for Cortez Lawrence who provided the bike to PGM. ... 1976 C& J Frame w/ fresh powdercoat; 1976 XL 250 w/Powroll 360 bore & stroke kit (fresh rebuild) (This was the HOT set-up back in the day as it was 15lbs lighter than an XL350 ...

Honda XL350 K2, model year 1976, (North America) (Australia) export (up to late-year) manual 5-speed gearbox gasoline (petrol) engine with displacement: 348 cm³ / 21.3 cui, advertised power: 22 kW / 30 hp / 30 PS (DIN), torque: 27 Nm / 20 lb-ft

so i have had this 74 honda xl350 for about 5 years turning it into a cafe racer. Everytime i get to do the electrical it puts a halt in my plans. I want to convert it to 12v but I was wondering if anyone has converted it to a newer style stator? Any positive input would be greatly appreciated an...

My 1976 XL 350 has a dead battery, runs great, blinkers and gauge lights don't work unless at higher RPMs for some reason. You could probably just replace the battery with a little 6v and ...

This 1976 Honda XL350 is powered by a 348cc four-stroke SOHC single and is finished in red and black with white enduro-style fenders. ... previous owner, from whom the seller acquired it in 2021. Equipment includes a Mikuni carburetor, a ...

In 1976 Honda did a major revamp of the XL350, calling this one the K2, with chassis changes that increased the fork rake to 32 degrees, trail to 5.5 inches. A new cylinder head allowed better intake breathing, and a very neat high-level exhaust system was tucked behind the frame and exited on the right side--taking care of that previously ...
