

9. Remove the pulley with a power steering pump puller tool. 10. Disconnect and cap pressure and return lines from the pump. Have a suitable catch pan under the pump. 11. Remove pump attaching bolts, then the pump. 12. Reverse procedure to install. Note: (Use the power steering pump pulley installing tool, it's different from the puller tool).

92 Astro van lost both power steering and power brake assist. It has the hydro-boost. ... During freezing weather the hydro-boost seals froze and blew out because of the moisture in the system. The power steering pump was also completely shot. My fix (expensive) was to replace the hydro boost with a junk yard used one(\$200), the steering box ...

This is important in a "closed-system" under heavy conditions so the fluid doesn't boil and cause cavitation, which can damage a power steering pump. At least that's my understanding. Transmissions don't run near as hot. I used ATF for most of my life.. but now I "know better" and just use what was "intended" for the system.. power-steering fluid.
