

2011 prius solar panel

Identical issue here in Amsterdam (the Netherlands), 2011 Prius with solar roof. The rubbers on the edges of the moonroof (or sunroof) are deteriorating. ... I was gobsmacked that they engineered it so that the whole panel has to be replaced for an (I hope!) aesthetic fix. It's pretty rainy where we live, so we're really counting on that under ...

I'd also have a PWM (Victron or Renogy) solar controller hooked up to a 100w mono flexible panel to charge when parked as I'm only doing one or two short trips a week with the Covid lockdowns we're having in Australia. My understanding is that the Prius' DC to DC 70 amp peak converter alone wouldn't fully charge the lifepo4.

Page 39 Solar ventilation system (if equipped) With the "POWER" switch in ON mode, turn on the solar ventilation switch. The solar ventilation system allows ventilation of the vehicle interior when the vehicle is parked in direct sunlight.

The power from the solar charge controller to the 12 V Prius battery should supplement the charging power from the hybrid system and be used by the car's 12 V systems, resulting in a higher MPG. When the car is parked or put on standby (not in READY), if the 12 V Prius battery becomes depleted, then the current (with higher voltage) from the ...

2011 Prius Model: Three. Your 12V battery is only used to power the ecu and connect the HSD system, then the traction battery takes over. So it gets recharged and so on while in normal operation. ... As you see above, I have 24 solar panels, each panel has a Snap RS to safely remove power in an emergency. <https://...>

It'll project your speed, the HSI (the horizontal bar on the smaller "MID that's standard on all Prius. It's the Hybrid System Indicator) as well as navigation instructions when you're under route guidance. (very cool!). So as a whole, moonroof, solar panel, harddrive-based nav and HUD, it's a pretty good package for \$3,500.

embedded with solar panels. When Prius is parked in direct sunlight, these solar panels can power a fan that brings in cooler outside air, ventilating the cabin close to the ambient outside temperature. How cool is that? 1. See footnote 5 in Disclaimers section. 2. See footnote 8 in Disclaimers section. 3. Available on Prius Three and Four only. 4.

The original intent of that solar panel was to charge the hybrid battery. They ran into some issues with some sort of interference (electromagnetic I guess). ... 2011 Prius Model: Five. I bought a used 2011 plus performance evolution with the sunroof / solar panel and I love it! I live in Gilroy and have also used the AC button on a hot day.

2011 prius solar panel

I have Prius 2011 Solar panel sun roof edition, it has great features like solar panel ventilation system, turning on Car AC with a button on Remote key and the headlights washers. It's a great value for money as this car is fuel efficient and luxury too. Exterior of ...

2010-2011 Solar Roof Package: One-touch open power tilt/slide moonroof, Solar Panel Ventilation System with Remote A/C, DVD-Based Navigation System, Bluetooth Streaming Audio, USB w/ iPod Connectivity. For the Prius IV/Four Solar Roof package, add Safety Connect 2012-2015 Prius Three Solar Roof Package: One-touch open power tilt/slide moonroof, Solar ...

Energy Independence: Harnessing solar power with a Prius solar roof promotes energy independence by allowing you to generate electricity on the go. This independence from traditional fuel sources can provide peace of mind ...

Energy Independence: Harnessing solar power with a Prius solar roof promotes energy independence by allowing you to generate electricity on the go. This independence from traditional fuel sources can provide peace of mind during emergencies or long journeys where access to charging stations may be limited. Relying on the sun's energy can help maintain ...

The all-electric Leaf from Nissan doesn't offer a full solar roof like the Prius, but it does have a solar panel option that sits on top of the car's rear spoiler. You can't just get the solar spoiler by itself, however, as it comes wrapped up inside the highest trim level, the SL, which will run you up to \$6,110 more than other editions of the Leaf.

Get the wholesale-priced Genuine OEM Toyota Weather Strip for 2011 Toyota Prius at ToyotaPartsDeal Up to 32% off MSRP. ... Manufacturer Note: MOON ROOF-WITH(SOLAR PANEL) Part Name Code: 63251H. Item Weight: 1.30 Pounds. Item Dimensions: 23.5 x 21.8 x 2.1 inches. Condition: New. Fitment Type: Direct Replacement. SKU: 63251-47010.

Other than the unusual instrument-panel design, the 2011 Toyota Prius has the look and feel throughout of an inexpensive compact. 5. ... Other major options include a moonroof with solar panels ...

2010 Prius (Aug '09 delivery) w/ solar roof and 74,000km. No issues other than some rattling when it's open and I'm going over bumpy roads (it's only held at one end on rails because it goes over the roof, rather than in between the roof and the headliner).

Hello, I'm currently in the market looking at a Prius IV with about 90k mileage on it. This package has the solar roof included. I've heard about the 2010 models having more issues than 2011+ with the control valve etc.

My 2013 Prius solar roof panel is showing signs of the green tint on all the internal edges of the wire elements.

2011 prius solar panel

As others on Priuschat have pointed out, this is a indication that moisture has invaded the elements inside and thus a matter of time before the panel fails. I have 11 months of warranty left and Toyota will not "fix" it as it is ...

However, I looked at the seller inventory over the weekend, and found a 2011 Prius that appears to be good and is within my budget. Selling price is \$9000. It comes with rearview camera, navigation, leather seating, JBL speakers, XM radio, multi-CD changer, etc. Original battery and stock parts. ... The solar roof is good in the summer but make ...

Installing a solar roof on your Prius can help you experience the advantage of extended battery life for your hybrid vehicle. The solar panels continuously generate electricity, which helps maintain the charge in the ...

Prius Solar Panel Roof Option. in Extrication, Special Operations August 13, 2011 Comments Off on Prius Solar Panel Roof Option. The solar panel generates a nominal 60 watts of electricity but does not produce high voltage. The maximum output possible is 27 volts and maximum current of 3.6 Amps. This is under optimal conditions.

From a personal cost-benefit analysis, I just don't see the allure of the Solar Panel. I'd like a moon roof very much, but don't want to be saddled with the de facto, say \$1000, extra cost of the Solar Panel. If the Solar Panel were offered as a separate option for \$1000, I doubt that many people, even here, would buy it.

[FONT="& quot]Thanks, Matt. I, too, just got a new model 4 with the solar panel. Hard to justify the cost difference between a model 4 with the solar package and without, but I love sunroofs and liked the HD NAV. [/FONT] I decided to scale back and downsize after driving much nicer cars--BMW, MBZ, Lexus--and wanted the higher gas milage of the Prius.
