If you have no need for a heating or a water-heating system, you can use your 25-watt solar panel to charge deep-cycle batteries and then use them for lights, a small TV, a water pump, or even a fridge. This reduces your fuel consumption, as your solar panels generate electricity you would normally get through a power generator.

The Suaoki 25W was my first mid-power, high-efficiency (20-25% transition efficiency) solar panel. I own another 14W/single port from them and both work perfectly since the start. I use both for daily activities, the small one usually stays in my bag 24/7 and the 25W presented here goes to the wilderness when I need more capacity.
