Non power assist steering = No power pump and/or power steering cylinder (no Mercruiser cylinder on board, no power pump) requires manual Hydraulic cylinder # HC5332. This means that all that you will have is a helm pump (at the steering wheel), two steering lines, going to a steering cylinder attached directly to the outdrive (HC5332).

I have a Mercruiser 454 stern drive with "Power Assisted Steering" on a 25ft Pursuit. The problem I have is that I want to put a 4 stroke trolling motor on it with a rod hooking it to the outdrive but you can't steer unless the engine is running. Has anyone ever replaced this with a regular hydraulic steering system?
