

The results show that: (1) according to the general requirements of 4 rows and 5 columns fixed photovoltaic support, the typical permanent load of the PV support is 4679.4 N, ...

Residential photovoltaics (PV) presents an effective means of achieving low-carbon development, owing to its installation flexibility and resource-saving properties. To explore the residents' ...

The tourism value of a location as a possible factor influencing the acceptance of photovoltaic sites has hardly been discussed. To fill this gap, this study focused on a solar energy project in ...

PV-CPC using an acrylic lens-walled structure has a larger half acceptance angle than the mirror CPC, and that a maximum optical efficiency of more than 80% can be achieved using Schott ...

photovoltaic (PV) energy is renewable, generates low emissions relative to fossil-fuel sources (Kreith et al., 1990), and is the cheapest source of electricity in the world (IEA, 2020); the ...

China, as the world's largest power generator, faces challenges owing to its coal-based electricity mix, contributing significantly to greenhouse gas emissions [1] 2022, ...

Semantic Scholar extracted view of "A Research Review of Flexible Photovoltaic Support Structure"; by ?? ? ... Skip to search form Skip to main content Skip to account menu. ...

Practical implications On the policy front, this study reveals that governmental support is needed to trigger PV acceptance. Originality/value This paper uses TAM to analyse the uptake of solar PV ...

Acceptance content of photovoltaic support foundation
