

Actually additions energy storage

The Ring of Liquid Banning is an item added by Actually Additions. When held in the hand, it will drain energy and cause all of the Water and Lava around the player in a 3 radius area to disappear. This can be disabled by holding the shift key. Each Water block removed consumes 150 Crystal Flux (CF), and each Lava block removed consumes 300 CF. The Ring of Liquid ...

The energy loss of the energy laser relays make them a really bad way of transferring power. They also look really bad. The item repairer, despite the high RF costs, is OP. The mod is barely configurable. Ellpeck does not care about fixing bugs or listening to the community. Suggestions are instantly dismissed, and the mod will never be improved.

The Firework Box is a block added by Actually Additions. It will randomly generate a Firework Rocket at the cost of 300 Crystal Flux (CF). Right-clicking the Firework Box with a Redstone Torch will change its mode. Per default, the Firework Box is deactivated by Redstone, but if configured it can be activated by Redstone pulses. The Firework Box can be right-clicked to ...

The Atomic Reconstructor is a block added by Actually Additions. It is used to create crystals and other items at the cost of 1,000 Crystal Flux per tick (CF/t). When powered, it will shoot a laser, and that laser will convert the blocks or items it hits into new blocks or items if they are convertible. Right-clicking the Atomic Reconstructor with a Redstone Torch will change its ...

The Empowerer is a block added by Actually Additions. It used to "empower" items and blocks. The Empowerer requires four Display Stands to be surrounding it, two blocks away at each side. In order to empower the center item, each Display Stand must hold a specific item and requires a minimum amount of Crystal Flux. The items (known as modifiers) and the amount of energy is ...

This page is about the Farmer added by Actually Additions. For other uses, see Farmer. The Farmer is a block added by Actually Additions. It will automatically plant and harvest crops in a 9x9 area in front of it at a cost of 1,500 Crystal Flux (CF) per operation. The left side of its GUI contains Seeds (what it will plant) and the right side contains harvested goods. The Farmer on ...

The Vertical Digger is a block added by Actually Additions. It will mine blocks, at the cost of 650 Crystal Flux (CF) per block mined. The Vertical Digger has two modes- "Mining Everything" and "Only Mining Ores". Each do as they describe. Per default, the Vertical Digger has a radius of 2 blocks, meaning it mines in a 5x5 area. Placing a Phantom Booster on top of it will double the ...

The Double Battery is an item added by Actually Additions. It is used store Crystal Flux (CF) in item form. The Double Battery can be charged in an Energizer and discharged in an Enervator. Shift right-clicking it will

Actually additions energy storage

turn on "discharge mode", where it will charge any CF items in the users' inventory. Shift right-clicking again will turn it off. The Double Battery on the online Actually ...

Actually Additions is a utility and technology mod created by Ellpeck. It works with Minecraft versions 1.7.10, 1.8.9, 1.9.4 and 1.10.2. The most stable versions are for MC 1.7.10 and 1.10.2. Actually Additions adds lots of machines, instruments, food and other utilities.

The Actually Additions Manual is an in-game manual added by Actually Additions. Right-clicking it will open it. The first time the Actually Additions Manual is opened, a message and button will appear, allowing for the automatic addition of bookmarks recommended by the mod author. Once that message is cleared, it will be replaced by a random quote about the mod and links to the ...

View the changelog of Actually Additions's 10 versions. Mods . Resource Packs . Data Packs . Modpacks . Shaders . Plugins Fixed Energy lasers not properly filling mekanism energy cubes only needing 2 FE. ... Fix energy storage of machines not working; Actually Additions 1.3.0+mc1.21.1 by Mrbysco on Oct 17, 2024.

The Player Interface is a block added by Actually Additions. It functions as a way to interact with the player's inventory. When placed, the Player Interface will automatically be connected to the player's inventory. Items can be pumped in or out of the Player Interface, and those items will be pumped in or out from the player's inventory accordingly; the Player Interface acts as a way to ...

Actually Additions is a utility and technology mod created by Ellpeck. It works with Minecraft versions 1.7.10, 1.8.9, 1.9.4 and 1.10.2. The most stable versions are for MC 1.7.10 and 1.10.2. Actually Additions mod adds a lot of machines, instruments, food and other utilities. Like many other "industrial" mods, Actually Additions mostly uses RF energy to power its machines, but ...

The Battery Box is a block added by Actually Additions. It is used to store Crystal Flux (CF). The Battery Box does not store energy directly; right-clicking it with a battery, such as the Single Battery, will add the battery to it.

The Coffee Maker is a block added by Actually Additions. It is used to create Coffee at the cost of 150 Crystal Flux per tick (CF/t). The base Coffee will require an Empty Cup, 15 Coffee Beans, 500 mb of Water and Crystal Flux. Coffee can be amplified with special effects by adding items in the top right corner of the machine; more information can be found on the Cup with Coffee page. ...

The Item Laser Relay is a block added by Actually Additions. It will wirelessly transmit items to another Item Laser Relay when connected. The Item Laser Relay can be connected by right-clicking two pairs with a Laser Wrench. Items will only flow through the Item Relay if one is connected to an Item Interface and another is connected to another inventory. Items put into ...

It offers energy production, ore doubling and smelting, item/fluid/energy transport, machines for farming and

Actually additions energy storage

fishing and even some nice unique crafting mechanics with the laser beam thing ...

This page is about the Crusher added by Actually Additions. For other uses, see Crusher. The Crusher is a block added by Actually Additions. It will convert an Ingot or Gem into its corresponding Dust, and an Ore into 2 Dusts. It uses 4,000 Crystal Flux (CF) total at a rate of 40 CF per tick (CF/t), making each operation take 100 ticks or 5 seconds. The Crusher is in some ...

The Bio Reactor is a block added by Actually Additions. It will generate varying amounts of Crystal Flux (CF) while burning seeds, foods and plants (anything that extends or implements IPlantable, IGrowable or ItemFood). ... Actually Additions: Type: Machine: Energy; CF storage: 200000 CF: Max CF output: 4-256 CF/t: RF storage: 200000 RF: Max ...

Phantom Energyface is a block added by the Actually Additions mod. It allows to use the energy of linked blocks. A Phantom Connector must be used to provide info about selected position to the Phantom Energyface.. Phantom Energyface has a default range of 16 blocks, but it can be upgraded with 1-3 Phantom Boosters placed at the top of it. Any booster doubles the previous ...

The ESD is a block added by Actually Additions. It is an advanced version of the Hopper. Within the GUI, the side used for its input and output can be configured. Additionally, the slot ranges in the inventory that are pulled from/pushed to by the ESD can be configured. One slot is added for an Item Filter. When added, the items in the Item Filter will be whitelisted in the ESD. The ...

The Double Crusher is a block added by Actually Additions. It does the same operations as the Crusher, but it has two slots for input. It is as fast as the Crusher, but it will consume twice as much energy while crushing two Ores at once. The Double Crusher on the online Actually Additions Manual

The Storage Crate Keeper is an item added by Actually Additions. When placed in a Storage Crate of any variety (Small, Medium, or Large), the Storage Crate will keep its items when broken. When broken, the Storage Crate Keeper will be consumed at the cost of keeping the items. The Storage Crate Keeper on the online Actually Additions Manual

storage crates. small, medium and large. all awesome. small crates are twice as large as a double vanilla chest. ... Actually Additions is one of the older mods around. ... It offers energy production, ore doubling and smelting, item/fluid/energy transport, machines for farming and fishing and even some nice unique crafting mechanics with the ...

The Heat Collector is a block added by Actually Additions. It will generate 40 Crystal Flux per tick (CF/t) when surrounded by four Lava blocks. Each 1,000 ticks, there is a 0.5% chance of one of the Lava blocks being consumed, or a 0.5% chance per 50 seconds, or a 36% chance per hour. Before version 1.11-r86, each tick, there is a 0.01% chance of one of the Lava blocks being ...

Actually additions energy storage

A long-time fan favorite, Actually Additions is returning to Minecraft 1.20.4 with brand-new models and textures and lots of overhauls! Use the Atomic Reconstructor and the Empowerer to turn minerals into powerful crystals that allow the creation of useful machines for processing and sorting items, lasers for wirelessly transporting energy, items and fluids, renewable oil to ...
