

American solar eclipse company

Is Great American Eclipse a trademark?

The phrase "Great American Eclipse" is a registered word mark and the Great American Eclipse logo is a registered trademark with the United States Patent and Trademark Office. A total solar eclipse is coming to America on April 8, 2024. Find maps, videos, how to view, best places to go, eclipse glasses, and more.

Where are eclipse glasses made?

They feature detachable, safe solar filters responsibly sourced from China that comply with the transmittance requirements of the ISO 12312-2 standard. This U.S. company's eclipse glasses incorporate ISO-compliant filter material that is made in the U.S. but finished, cut, and mounted in frames by a Chinese manufacturing partner.

How many solar eclipses are coming to North America?

Two more major solar eclipses are coming to North America. On October 14, 2023, an annular ("ring") eclipse sweeps from Oregon to Texas and then on to Central and South America. Just six months later, on April 8, 2024, a total solar eclipse darkens a swath across Mexico, from Texas to Maine, and then on to the Canadian Maritimes.

When are the next solar eclipses in North America?

The next two solar eclipses in North America will be the Annular Solar Eclipse on October 14, 2023 and the Total Solar Eclipse on April 8, 2024! The Annular Solar Eclipse of 2023 will cross the US from Oregon to Texas and then will proceed to Central America and South America.

What are solar eclipses?

Solar eclipses are alignments of the Sun, the Moon, and You. You are an active participant in finding your best locations for the two eclipses. We provide the best eclipse maps and Field Guide to help you plan your adventure. Our maps are especially handy in the field if the weather forces you to relocate.

Where can I get Free eclipse glasses?
