The unit does not provide power during a utility power outage. Ensure that essential equipment is not plugged into a SURGE ONLY outlet. Disconnect equipment from the SURGE ONLY outlet and re-connect to a BATTERY BACKUP outlet. The unit is operating on battery power, while connected to utility power.

Take the new APC UPS battery and inspect it for any visible damage or defects. Ensure that it matches the specifications of the old battery and is compatible with your APC UPS model. Position the new battery in the battery compartment, aligning it with the terminals and connectors inside. Be cautious not to force the battery into place.
