

Cisco's IoT Control Center positions utilities to unlock the full potential of smart metering and the smart grid. As a key element of the Cisco Mobility Services Platform, IoT Control Center is the ...

Internet of Things (IoT) is the networking of physical objects that contain electronics embedded within their architecture to communicate and sense interactions amongst each other or to the external environment. Internet of ...

The Internet of Things (IoT) is a concept where everyday objects are connected to the internet, allowing them to communicate and share data with each other. Think of things like your smart fridge, thermostat, or even your ...

This type of smart grid is referred to as Smart Water-IoT (SW-IoT), a novel, comprehensive water management concept. This review article discusses the application of IoT components and artificial intelligence (AI) in ...

This book constitutes the refereed proceedings of the 8th EAI International Conference on Smart Grid and Internet of Things, SGIoT 2024, held in Taichung, Taiwan, during November 23-24, ...

Germany's largest distribution grid operator E.ON has built a digital twin for its 700,000km power grid via a central data platform. This means more than a third of the entire German distribution ...

Proactive engineer with a background in software development and smart grid solutions, seeking to transition into an engineering role that focuses on the Internet of Things (IoT) applications in ...

First, this paper provides an in-depth review of the key considerations surrounding safety and security in smart grid environments, identifying potential risks, vulnerabilities, and challenges ...

Smart sensors and IoT-enabled communication systems can detect abnormalities, predict failures, and facilitate demand response strategies. By leveraging machine learning and AI-powered ...

The Power Line Communications (PLC) IC market is experiencing robust growth, projected to reach a market size of \$2988 million in 2025, expanding at a Compound Annual Growth Rate (CAGR) of 11.6%. This significant expansion ...

Challenges in power quality and reliability present significant difficulties in conventional power grids for both service providers and customers. Smart grids (SGs) provide the opportunity to ...
