

# Are free solar panels worth it

Are free solar panels worth it?

"Free" solar panels will save you money because energy from solar power is usually less expensive than energy from the electrical grid. Keep in mind, however, that these savings from solar energy are possible regardless of if your solar panels are leased versus purchased. The long-term cost savings help you determine if solar panels are worth it.

Does the government offer free solar panels?

The government does not have any programs that offer totally free solar panels. However, several state and federal government programs can help you access solar energy equipment with lower upfront costs. These tax credits and incentives can reduce solar installation costs, making solar energy more accessible.

Is 'free solar' a good idea?

Zero-money-down installation, free maintenance, free enrollment, guaranteed savings written into the contract -- these promises are all just a little too good to be true. We'll get into the fine print on why "free solar" is so misleading, but if you're looking to install solar panels on your home for \$0 down, it's best to do so with loan financing.

Are free solar panels a scam?

Many other "free" or "no-cost" solar programs are outright scams. Tax credits and other incentives can reduce the upfront costs of going solar without committing you to unfavorable terms -- just make sure they're legitimate. Can you get free solar panels?

Are "free" solar panels a good idea?

The concept of "free" or "no-cost" solar panels really is too good to be true. "Free" solar panels are essentially rented from solar companies. While you will reap the benefits of cheaper electricity bills through solar power, you do not own the panels; the solar company does. Once your lease agreement is up, the panels will be removed.

Are solar panels affordable?

Additionally, falling equipment prices and government incentives have made solar increasingly affordable for homeowners. But solar panels aren't for everyone. "Solar is very bespoke," explained Aaron Nichols, a solar researcher for Exact Solar in Newtown, Pennsylvania.

Arkansas ranks 33rd in the country for solar conversions and offers residents one of the best net metering program options in the country. The state also gets more than the national average of sunny days per year, meaning there is plenty of sunshine to make solar panels worth the investment for most homeowners in the area.
