

Arotech power systems

What business divisions does Arotech have?

Arotech operates through two major business divisions: Interactive simulation for military, law enforcement and commercial markets, and batteries and power systems for the military.

What is Arotech?

Arotech is a company that creates quality defense and security products for the military, law enforcement and homeland security markets. For more than 50 years, FAAC, a part of Arotech, has provided systems engineering and software products to the U.S. government and private industry.

Why should you choose Arotech?

Arotech's fully interactive operator training systems feature state-of-the-art vehicle simulator technology enabling training in situation awareness, risk analysis and decision-making, emergency reaction and avoidance procedures, conscientious equipment operation, and crew coordination.

Where is Arotech located?

Arotech is incorporated in Delaware, with corporate offices in Ann Arbor, Michigan and research, development and production subsidiaries in Michigan, South Carolina and Israel. Until late 2019 they were publicly held (NASDAQ: ARTX). In December 2019 Arotech was acquired by Greenbriar Equity Group and taken private.

Who is arkotech Corporation?

ARKOTECH Arkotech Corporation is a full-service digital agency that specializes in capturing the vision of our clients and creating tangible results. Combining our talents and experience enables us to create cutting-edge solutions for our clients by connecting with ideas on a deeper level and developing effective, achievable plans.

What services does arotec provide?

One of the services that AROTEC provides is project management and managing the entire team to ensure that the project is completed on time and within budget. To achieve this, project managers are always aware of the development process so that any difficulties can be resolved quickly and, at best, prevented.

The contract is valued at \$6.7 million and will be executed by Arotech's North American Power System division, which includes UEC Electronics. CESAS is a high-power, ground-mobile electronic attack asset that provides US Marine Corps commanders the ability to disrupt, deny and detect enemy communication.
