

British Solar Renewables reached financial close on 12-project solar portfolio with three co-located battery energy storage system (BESS) assets. The GBP 345 million financial package covers ...

This approval marks a significant step for Australia's green hydrogen industry, establishing Energys as a pioneer in sustainable energy production. The project supports Victoria's ...

In principle, in a fully decarbonised global energy system, the need for hydrogen certification schemes would become redundant. However, the pace of transition--both within ...

eCap Marine says it will supply 8 MW of hydrogen fuel cell systems for four zero-emission vessels under construction for Norway's Møre Sjøø and logistics firm Samskip, with deliveries expected ...

Major project cancellation exposes fatal flaws in Australia's hydrogen export strategy ChatGPT generated image illustrating the integration of renewable energy and Australian ammonia ...

A request for proposals from six qualified bidders interested in developing a 22.5 MW solar-plus-battery project is now live in the Cayman Islands. The project will be the islands' largest solar ...

ATCO Australia's Clean Energy Innovation Hub, which began blending hydrogen into the existing natural gas network at volumes of up to 10% in 2023, reaching more than 3,000 customers. ...

Storage - Hydrogen is compressed or converted to liquid form for transport or storage. Power plants utilize it for electricity generation. Fuel cells power buildings, vehicles, and off-grid ...

Beyond hydrogen generation, CRT said the C-Cell's membrane-electrode structure offers pathways for multiple applications including flow batteries for grid-scale storage using redox ...

Nanyang Technological University researchers have milled solar panel glass waste for use in cathodes used in solid state lithium metal batteries. When used as a functional filler in solid ...

Decarbonising Australia's existing ammonia production with domestically produced renewable hydrogen presents a practical, economically viable path toward rapid emissions reductions. ...

Hydrogen produced from renewable sources, is an alternative source of clean fuel for industrial and domestic use, but currently faces challenges in terms of cost, and production capacity ...

Did you know that Australia is transforming the way we produce and transport green hydrogen? Thanks to a

Australia hydrogen energy storage

project led by Curtin University and supported by ARENA, innovative technology ...

OTSO is an open-source platform advancing hydrogen energy research. Explore cutting-edge technologies in electrolysis, biohydrogen, and fuel cells, empowering industries across automotive, aviation, defense, and space ...

Australia hydrogen energy storage
