

A draft plan for the cybersecurity sector released by China last week has renewed the debate over responsible growth of emerging technologies. As part of the country's efforts to ensure security in the handling of the ...

Zenobe Energy is the largest independent owner and operator of battery storage in the UK. It buys and manages grid-scale batteries for its commercial customers, such as utilities and electric-vehicle operators.

Popular MSSPs such as IBM Security, SecurityHQ, and Re-Solution Data Ltd. cater to businesses of all sizes, providing tailored solutions to safeguard networks, data, and IT infrastructure. By partnering with MSSPs, businesses ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

As the BSI confirms, they are using various attack vectors: supply chain attacks target the hardware and software products used in energy systems. A compromised control unit in the ...

Local Energy Markets (LEMs), though pivotal to the energy transition, face growing cybersecurity threats due to their reliance on smart grid communication standards and vulnerable Internet-of ...

NATIONAL AFFAIRS India Energy Storage Week 2025 Held from July 08 to July 10, 2025 in New Delhi
The 11th edition of India Energy Storage Week (IESW 2025), a premier international conference and exhibition was held from July 08 ...

It also provides an understanding of the evaluation of mitigation strategies, including advanced encryption, real-time anomaly detection, and standardized cyber security protocols. The study ...

Siemens Energy offers a leading portfolio and solutions in HVDC transmission, grid stabilization and storage, high voltage switchgears and transformers, and digital grid technology. Who is ...

Inconsistent cybersecurity practices in organisations pose a threat to the energy sector. A new handbook from the University of Vaasa offers a structured, user-friendly resource to enhance ...

Explore the critical challenges and essential solutions for securing Distributed Energy Resources (DERs) in the digital era, focusing on cybersecurity measures, policy frameworks, and ...

Base station energy storage cybersecurity

On July 17, 2025, SunSpec Alliance hosted a critical webinar addressing cybersecurity threats facing solar energy systems and exploring innovative strategies for enhancing grid resilience. ...

Behind-the-Meter Strategy for Urban and Off-Grid Growth Rather than large-scale grid storage projects, Leoch is focusing on "behind-the-meter" solutions -- battery systems designed for deployment at the end-user level, such as telecom ...

As the backbone of modern energy systems, smart grids and digital substations promise efficiency and sustainability--but they also open the door to escalating cyberthreats. This article dives ...

Top 50 Best Cyber Security Companies 2025 In the ever-evolving cybersecurity landscape, these 50 companies stand out for their innovative solutions, robust security measures, and commitment to protecting ...
