

BYD ceased production and sales of vehicles powered solely by internal combustion engines in June 2022, shifting its focus to producing plug-in hybrid electric vehicles (PHEVs) and battery ...

Imports of battery electric vehicles (BEVs) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

Top-Selling Battery-Electric Car Brands in Europe in 2025 (June & Half Year) Battery electric vehicle sales in Europe continued to increase. For the first time, over one million BEVs were registered in the first semester for a total of ...

These components are specifically designed for automotive batteries used in battery electric vehicles (BEVs) and plug-in hybrid vehicles (PHEVs), with the expansion finalized as of June ...

Unlike plug-in hybrids, BEVs run exclusively on electricity stored in large-capacity battery packs and emit zero tailpipe emissions, helping countries move closer to net-zero goals. Automakers ...

BMW Group has announced its commitment to hydrogen fuel cell technology, planning to launch its first hydrogen-powered vehicle into series production by 2028. This move positions the ...

Electric vehicles (EVs) are revolutionizing the way we think about transportation, offering an eco-friendly alternative to traditional gasoline-powered cars. These vehicles run on electricity ...

Battery Electric Vehicles (BEVs) and Hybrid Electric Vehicles (HEVs) share some components, but not all: Auxiliary battery: Both BEVs and HEVs use an auxiliary 12V battery for low-voltage systems (lights, infotainment, etc.).

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

In China, electric vehicles are especially affordable due to government subsidies, low electricity prices, and cost advantages from mass production. In contrast, high electricity costs and the...

Looking Ahead The EU car market in H1 2025 highlights a clear pivot toward electrified vehicles, with hybrids leading the charge and battery-electric models steadily gaining ground. However, ...

Hydrogen fuel cell cars (FCEVs) have been on the market for a similar duration to the current wave of battery EVs (BEVs). But they have sold a tiny fraction in comparison. In 2024, 12,866 ...

Hydrogen vs. Batteries: Is the Future of Cars Fuel Cells or Charging? The automotive industry is in a whirlwind of change, with electric vehicles (EVs) taking center stage. But while battery ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

, that view hydrogen as a complementary technology to battery electric vehicles (BEVs). BMW's strategy hinges on leveraging its existing EV infrastructure and components, such as electric ...

While hydrogen fuel cell vehicles have been viewed by some as competitor's to battery electric vehicles (BEVs), BMW sees the two technologies as complementary. For BMW, the future of ...

In the first half of the year, battery-electric cars (BEVs) accounted for 15.6% of the EU market share, an increase from the low baseline of 12.5% in H1 2024. Hybrid-electric car registrations ...

"The good news is a hydrogen vehicle is an electric vehicle," says Guldner. "It's just a different way of storing the energy versus a battery, which also means that we can reuse a lot of the ...

Battery Electric Vehicles (BEVs) These are fully electric powered with no Internal Combustion Engine (ICE). Powered by an electric motor and rechargeable batteries. There are zero emissions from the tail pipe but will require access to ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

Battery electric vehicles bevs
