

Battery powered receptacle

How do you attach a battery receptacle?

Attach the red and black wires to opposite sides of one outlet (either the lower or the upper) on the receptacle. In other words, choose an outlet, place each wire under each screw on either side of the outlet and gently tighten the screws to secure the wires. Load the battery pack with batteries and attach the snap connector to the battery pack.

Can I use a battery-powered plug receptacle on a 12V lamp?

PLEASE NOTE: This battery-powered plug receptacle is for LOW-VOLTAGE electronics only, like the 12V lamp. The batteries cannot power your usual 120V electronics. I have only used it on the 12V lamp, and I would not recommend attempting to power any other device unless you are confident about the voltage requirement of the device.

How do I make a battery-powered outlet?

Screw your 12V lightbulb into your lamp of choice and plug in the lamp. Hide your outlet and battery pack by placing them inside the lamp base (if there's room), mounting them under the table with command strips, or placing them in a decorative basket. I opted for the decorative basket: And that's how to make a battery-powered outlet!

How do you connect a battery pack?

The battery pack kit comes with a snap connector that looks like this: Attach the red and black wires to opposite sides of one outlet (either the lower or the upper) on the receptacle. In other words, choose an outlet, place each wire under each screw on either side of the outlet and gently tighten the screws to secure the wires.

How many Watts Does a 18V one+ battery use?
