

A transformative research partnership led by Swansea University in the UK, in collaboration with tertiary institutions in Kenya and Nigeria, has secured major UK government funding to fast ...

St Kitts and Nevis: The construction of the much-awaited Basseterre Desalination Plant is now over 70% completed, as announced by Prime Minister Dr Terrance Drew. Speaking during a ...

His research focuses on the development of advanced lithium and sodium batteries, covering polymer, hybrid and liquid electrolyte systems, new and optimized organic and inorganic electrode materials, sustainable ...

Given the rising importance of cost-effective solutions in battery research, this study employs an accessible testing approach using low-cost, sensor-equipped platforms that enable broader ...

Two projects led by the University of Oxford have received a major funding boost from the Faraday Institution, the UK's flagship institute for electrochemical energy storage research. The funding is part of a £19 million ...

Basquevolt has secured a EUR2.5 million grant from the EIC Accelerator program--and could raise up to EUR10 million more--after a top-score evaluation; its solid-state electrolyte promises 50 ...

Berkeley Lab AMCR researchers have developed a machine learning framework that dramatically accelerates battery lifespan predictions--using far fewer experiments--by combining expert ...

Bringing advanced battery research into real-world applications remains one of the most difficult challenges, requiring a three-stage, overlapping development process, argues Kieran O'Regan.

The aviation battery market is experiencing robust growth, driven by the increasing demand for electric and hybrid-electric aircraft. The transition towards sustainable aviation is a primary ...

Farasis Energy previously stated that its all-solid-state battery research and development adopts a high-nickel ternary + soft pack + stacking process route, and believes that the main ...
