

Best solar panel prices

How much does a solar panel cost?

Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300. The cost of a solar panel also depends on how you buy it. If you purchase through a full-service installer, you will likely get a lower price for each panel than buying them individually from a retail store.

Are solar panels worth it?

Solar panels can generate major savings if you're trying to reduce your electricity costs, carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs, the more a solar panel system will save you in the long run.

Are cheap solar panels a good choice?

Cheap solar panels vary in quality: usually, a higher price reflects a higher efficiency rating and, therefore, higher quality. Polycrystalline solar panels are typically cheaper than monocrystalline panels. Your payback period may be longer if you shop for solar panels with the lowest price tag.

How much does a SunPower solar panel cost?

With average project costs of around \$24,000 to \$29,000, SunPower's panels can be a bit more expensive than many competitors' products. But you certainly get significant value for your money. SunPower's 0.25% annual degradation rate starting at year two is significantly lower than almost all competitors.

Which solar company offers the best & most expensive solar panels?

After reviewing hundreds of solar panels, we found that SunPower offers the best (and most expensive) solar panels. Choosing the best solar panel can feel overwhelming, but it's easier than you might think. If you select a quality solar installer, in most cases they'll install quality solar panels. Many companies offer great solar panels.
