

Boulder solar power llc

What is the Boulder Solar Project?

The Boulder Solar project is a 150 megawatt (MW AC) photovoltaic power station near Boulder City, Nevada. It was built in two phases by SunPower using its Oasis Power Plant system. The project is co-located with several other large solar power projects in the Eldorado Valley .

Who owns Boulder Solar 1?

Southern Power purchased a controlling (51%) interest in Boulder Solar 1 in November 2016. New Energy Solar purchased the remaining 49% interest in February 2018. The electricity is being sold to NV Energy under a 20-year power purchase agreement.

What is Boulder Solar 1?

The 100 MW Boulder Solar 1 began construction on 600 acres in December 2015, and went online in mid-December 2016. It uses 288,000 tracker-mounted panels manufactured by SunPower. It has an expected annual production of about 280 GWh and will provide Boulder City with \$20 million in land lease payments over the 20-year term.

How much do solar panels cost in Boulder CO?

How much do solar panels cost in Boulder, CO? As of February 2024, the average solar panel cost in Boulder, CO is \$3.27/W. Given a solar panel system size of 5 kilowatts (kW), an average solar installation in Boulder, CO ranges in cost from \$13,903 to \$18,809, with the average gross price for solar in Boulder, CO coming in at \$16,356.

Are solar panels a good investment in Boulder?

Though installing solar panels requires a large investment to start, you can achieve considerable savings on your energy bills in the long term. In Boulder, you can expect to save money once you've gone completely to solar.

How do I find a reputable solar installer in Boulder?

Make sure your solar installer provides a consultative, professional solar experience, and if you're also purchasing a solar battery system, they have proven experience with those products too. By doing the legwork for you, EnergySage makes it easy to find reputable solar installation companies in Boulder, CO.
