

# Bracket type solar water mixing valve

What is a solar rated mixing valve?

Inta's solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures for the end user.

What types of solar thermal valves are available?

That's why we ensured our range of solar thermal valves has every type of valve you could possibly need. Our range of top-quality solar thermal valves includes thermal balancing valves, thermal relief valves, thermal mixing valves, and many more.

What is a mixing valve?

Mixing valve designed to reduce the high solar water temperature continuously to a safer level. For Gravity and pressurised system use. Got a Question? (Our Experts Will Answer It) Looking for more information? Ask a question and our experts will answer it.

What is a blending valve?

These valves have been specifically designed to function with a constant high temperature hot water supply, something conventional blending valves are not able to cope with as well as having high flow rates making them ideal for installation in conjunction with domestic hot water cylinders. Need Help?

Do solar thermal water heating systems need valves?

Like in any other traditional heating system, valves are an essential component in solar thermal water heating systems too. That's why we ensured our range of solar thermal valves has every type of valve you could possibly need.

Does BES offer a solar heating valve?

BES has an extensive range of valves available to suit a wide number of solar heating applications. Free next-day delivery\*. Great offers & low prices.

valve should be fitted to reduce the pressure(s) to within the limits as quoted previously. Any thermostatic mixing valve must be installed with isolating valves, line strainers and check ...

If you have a standard electric or gas tank, there are a number of things we can do to increase the amount of deliverable hot water from the simple to the complex. One of the ways to do that would be to simply increase ...

Thermostatic mixing valve designed to be installed in solar systems for the production of domestic hot water if it is necessary to adjust the temperature of the hot water to the users for comfort and safety reasons; this automatically mixes ...

# Bracket type solar water mixing valve

Solar thermal insulated flexible pipes, pipe insulation and insulation tapes are included in this range. Our top-quality pipe insulation products are designed to withstand high temperatures ...

The Solar Thermostatic Mixing Valve is designed to reduce the water temperature to a safer level. Unlike the under basin, or bath/shower types we are familiar with, the solar Thermostatic Mixing Valve is designed to function continuously at ...

This thermostatic mixing valve is designed for use in solar systems for producing domestic hot water. ... temperatures of the incoming hot water from the solar reservoir. Systems of this ...

Hot Water Mixing Valves: Advantages and Benefits. There are several benefits to installing a hot water mixing valve, including: Prevention of scalding injuries: A hot water mixing valve helps to prevent scalding injuries by ...

Helping you find the valve you need for your solar thermal water heating system . The valves used in a solar thermal water heating system force the water that is above a specific set ...

The 22 mm Solar Thermostatic Mixing Valve offers enhanced safety, efficient temperature control, and compact design, making it ideal for use in solar water heating systems. Alternative Options available. Benefits. Continuously ...

2. THERMAL EXPANSION -- Determine if a check valve exists in the inlet water line. It may have been installed in the cold water line as a separate back flow preventer, or it may be part of a ...

Unlike the under basin, or bath/shower types we are familiar with, the solar Thermostatic Mixing Valve is designed to function continuously at high temperatures, something a standard TMV cannot cope with. Delivers Solar ...

The mixing valve lets you set the flow temperature between 35 and 65°C and can be fed by any type of heat source including oil and gas boilers, wood burning stoves as well as solar, ground and air source heat pumps. Each control pack ...
