Please note that there is a guided installation available on our mobile app. View this article to learn more. Here are the installation guides for each of our products. These guides also come in the box with your Brilliant Control, and we're providing the most up-to-date versions here. Helpful?

Who should install a solar panel?

All electrical installation and procedures should be conducted by a licensed electrician or solar contractor. Routine maintenance of a module or panel shall not involve breaking or disturbing the bonding path of the system. All work must comply with national, state and local installation procedures, product and safety standards.

How do I install a solar stack module?

Insert the end clamps laterally in the pedestal. The end clamps are attached and then tightened at the height of the module frame. Modules should be installed to the Solar Stack pedestals with the manufacturer approved middle/end clamps. There are different types of clamps available for the module installation.

How does a smart solar panel wiring plan work?

The total output voltage and current of your array are determined by how you connect the individual PV modules to each other and to the solar inverter, charge controller, or portable power station. Even if you don't do any harm, a smart solar panel wiring plan will optimize performance and maximize the return on your investment.

How to install solar stack pedestals?

Solar Stack pedestals can be installed on different types of roofs: Tile, Modified Bitumen, TPO, Concrete etc. Roof must be cleaned with brush. Place, where the Solar Stack pedestals and solar panels are to be placed on the roof must be clean, dry and flat.

Do I need a primer before installing solar stack pedestals?

Before foam adhesive and Solar Stack pedestals are installed to the roof, "primer" coating must be applied for stronger bond between the TPO roof and foam adhesive. Appropriate "primer" must be determined with the roof manufacturer to avoid warranty issues. Determine the spacing of Solar Stack pedestals for your solar array design.
