

C max solar energi car

At CES, Ford will unveil the C-Max Solar Energi Concept, a lightly modified version of its compact plug-in hybrid crossover, with 1.5 square meters of flexible solar panels glued to the roof.

At the 2014 International CES Ford unveiled the C-Max Solar Energi concept, which should address some of our concerns about the plug-in hybrid. Search; Ford C-Max Solar Energi Can Charge Exclusively By Sun ... and one of our biggest complaints was due to the lack of charging stations that the break-even on the car would be next to impossible ...

The new innovation is the presence of built in solar panels that can also recharge the onboard batteries. In other words, the C-Max Solar Energi proposes an alternative to the dependence on electrical outlets. The roof of the car is composed of built in 1.5 square meters of photovoltaic panels.

The trouble is, electric cars draw too much power and take up too small an area for solar roofs to charge them as they drive along. There are other possibilities though, one of which Ford is exploring with the C-Max Solar Energi concept--which uses solar power to directly charge the plug-in hybrid's battery pack.

With a full charge, Ford C-MAX Solar Energi Concept is estimated to have the same total range as a conventional C-MAX Energi of up to 620 miles, including up to 21 electric-only miles. Additionally, the vehicle still has a charge port, and can be charged by connecting to a charging station via cord and plug so that drivers retain the option to ...

The Ford C-Max Solar Energi Concept, external has a solar panel system on the roof which tracks the position of the sun. The company said it can draw power equal to a four-hour battery charge.

Ford C-MAX Solar Energi Concept Car Electric cars offer freedom from the gas pump, but they tie drivers to the task of charging up. To truly cut the power cord, it would help if you could carry ...

Ford's answer is its C-Max Solar Energi Concept, which makes its debut at CES next week. ... The car uses a combination of high-efficiency solar panels and a separate frame roofed with a Fresnel ...

The Ford C-Max (stylized as Ford C-MAX and previously called the Ford Focus C-Max) is a car produced by the Ford Motor Company from 2003 to 2019. [1] It has a five-door compact multi-purpose vehicle (MPV) design. ... Ford C-Max Solar Energi concept exhibited at ...

Jan 2, 2014 | Dearborn, Mich. Let the Sun In: Ford C-MAX Solar Energi Concept Goes Off the Grid, Gives Glimpse of Clean Vehicle Future - Ford C-MAX Solar Energi Concept is first-of-its-kind sun-powered vehicle with the potential to deliver the best of a plug-in hybrid without depending on the electric grid for fuel -

C max solar energi car

ford motor company has presented the "C-MAX solar energi concept" ahead of the 2014 international CES in las vegas, a solar-powered plug-in hybrid vehicle that doesn't depend on the electric ...

Ford's C-MAX Solar Energi Concept benefits from amplifying the sunlight that enables the car's already-efficient SunPower solar cells to create electricity. A huge jump in solar energy conversion is accomplished with a ...
