

# Caisson power line systems

Power Line Systems was founded in 1984 to provide consulting services and develop engineering software for the structural and geometric design of electric power lines. Power Line Systems has become the world-wide leader in software for transmission lines. We supply software to over 1600 organizations in more than 125 countries.

Enterprise Level PLS Project Manager and Map Viewer. PLS-GRID is the latest software offering from Power Line Systems, the original provider of "digital twin" and "BIM" software for your overhead transmission, distribution, and communication lines for over 35 years. Leverage your decades of overhead line models built in PLS-CADD, PLS-CADD/Lite, PLS-POLE, and ...

CLASSES IN ASSOCIATION WITH THE UNIVERSITY OF WISCONSIN: Design of Transmission Lines, Structures, and Foundations (includes 32 PDHs), in association with the University of Wisconsin, TBD in Orlando, Florida (See UW Website). Computerized Transmission Line Design: PLS-CADD Hands-On Training (includes 32 PDHs), in association with the University of ...

All of the cable models that Power Line Systems has are listed on this site. If you do not find the cable you are looking for then you can contact your wire manufacturer and ask them for a cable file or properties to create your own as described in section 9.2 of the PLS-CADD manual.

Traveling to Madison. Madison is served most directly by the Dane County Regional Airport (MSN) which is 25 minutes drive from our office. You may also fly in via General Mitchell (MKE) in Milwaukee which is approximately 90 minutes travel time from Madison or through Chicago O'Hare (ORD) which is approximately 3 hours travel time. In all cases, we recommend you ...

Interoperability. While TOWER is a stand-alone program its open design allows it to easily interface with other programs. TOWER provides a well defined XML output file and hooks that enable pre and post-processors to be connected to the program making it the ideal engine of your custom lattice tower analysis process.

PLS-CADD (TM) Users List. This list was last updated on The list does not include the hundreds of users of PLS-CADD/Lite, the simplified version of PLS-CADD which is restricted to the calculation of sags, tensions, stringing charts, galloping ellipses and loading trees.

Wednesday: Computer Hardware Recommendations - Shelby Suski, Power Line Systems. New Analysis & Reports - Graeme Louw & Alan Fritz, Power Line Systems. Show Your Work! Commonly Underutilized Tools & Features in PLS-POLE and TOWER - Jason Kilgore, Mesa Associates. Clearances & Ratings - Dan McCormick, Power Line Systems LiDAR in Structure ...

Power Line Systems - Computer Aided Design and Drafting. PLS-CADD is the most powerful overhead power line design program on the market. PLS-CADD runs under Microsoft Windows and features an easy to use graphical user interface. It integrates all aspects of line design into a single stand-alone program with a simple, logical, consistent interface.

Starting with the release of version 13.33, Power Line Systems has completed implementing support for Windows 10. Support for Windows 11 came automatically, without changes to the software. All functionality works as you would expect so long as you only use version 13.33 or newer. We do not support mixing pre-13.33 versions with 13.33 and newer.

Power Line Systems does not collect, store, or share user information related to these services, and requires direct user authorization prior to use. Areas within the software which integrate with the above Google services are clearly marked and require explicit user consent.

SAGSEC allows engineers to perform the previously difficult analysis of strain bus configurations in substations. In short spans, the insulators, particularly porcelain and glass types, can cause unanticipated sags and over-tensioning of conductors, which could be detrimental to the physical design of the span, taps, and associated structures if not properly accounted for.

Power Line Systems accepts no responsibility for the accuracy of the data herein, and the PLS-CADD end user is responsible for the use and verification of all data obtained in this library. News Aug 4, 2023

Design Codes, Standards, and Manuals Used in Power Line Systems" Software. Miscellaneous. Recent Program Improvements. PLS-CADD: Complete line design package. PLS-POLE: Structural analysis of wood, steel, concrete and/or FRP poles and frames. TOWER: Analysis and design of steel latticed tower

PLS-CADD/LITE. PLS-CADD/LITE is a streamlined version of PLS-CADD used to quickly model a few spans. Developed specifically for Joint-Use type applications, PLS-CADD/LITE is the ideal tool for quick sag-tension, clearance and loads calculations.
