

# Can solar panels be installed in a house

Can solar panels be installed on a house?

If you're getting solar panels installed onto the roof of your house, the installers will need to construct scaffolding around the building before they can crack on with the process. This will take the most time out of all the steps - usually about a day - but will mean the installers can have safe and secure access to the roof.

Can solar panels be installed on a roof?

“The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.

Can you put solar panels on a wall?

But most wall-mounted panels are parallel to the wall, or only slightly tilted. It's also harder to fit as many solar panels on a wall as you would on a roof. A typical three-bedroom house can fit around 10 350-watt (W) panels on its roof, whereas a wall will only fit around two or three panels.

Should you buy or rent a home with solar panels?

With 69% of people telling our National Home Energy Survey that they're likely to buy or rent a home with solar panels, now is a great time to go solar. And if you're ready to get solar panels on your roof, it's never been simpler to compare prices with our easy-to-navigate tool.

How are solar panels installed?

Tiles are lifted so that the installers have access to rafters in the roof. Roof hooks are then inserted onto the rafters before the tiles are placed back, leaving the hooks protruding from the roof tiles. Solar panels are installed onto the mounts. Rails are then secured across the roof hooks so that the panels can lay onto them and be fitted.
