

Can you plug a power surge protector to battery backup

Can you plug a surge protector into a ups?

You may decide to plug a surge protector into your UPS to get more outlets to plug in more devices or have extra protection. Some technicians believe that you can safely plug the surge protector into a UPS. They think by plugging the surge protector into the UPS,you'll simply add a breaker to the circuit before the current reaches the UPS.

Do I need a surge protector?

The overarching idea is that a surge protector will safeguard your equipment and even the connected UPS from high voltage spikes. Just make sure never to exceed the maximum load of either strip (UPS or surge protector). Manufacturers like APC and Australian company UPS Solutions do not recommend plugging a UPS into a surge protector.

What happens if you plug a surge protector into a power strip?

You plug all your (safely sized) loads into the surge protector/power strip. Then one day someone else comes along with a space heater, or a coffee maker, or a laser printer, sees an open outlet on your power strip and your fancy UPS suddenly sees a less reasonable load.

How do I protect my power supply from a surge?

But exactly what one should do to protect against it gets a little fuzzier. The two most common means of protection are a standard surge protector,sometimes (wrongly) called a power strip,or an uninterruptible power supply,usually shortened to UPS. (No connection with the delivery guys in the brown shorts.)

Can you put a surge protector on a second wall?

Most UPS devices include a basic surge breaker and ground,and you can plug non-critical deviceslike speakers,phone chargers,or lamps into a cheap surge protector on the second wall outlet. Image source: Amazon,Souq

What is a surge protector & how does it work?

Surge protectors look for power surges and filter them out,but they don't distribute the amperage efficiently. That will cause some of your devices to shut down or reboot because they don't get enough power. On the other hand,power distribution units distribute the power evenly among all devices.

The number one problem with gadgets is that any fluctuation in power or Surge power can damage them. You can lose your work as well. Today, I will highlight the solution to this problem. I will share the 10 Best battery backup Surge protectors. Once you power your gadgets using these, it will become easier for you to protect your gadgets.

Can you plug a power surge protector to battery backup
