

Cannot power off system during active phone call

I have noticed (while searching like mad to put my phone in a universal waterproof case for my handlebar, where the proximity sensor is hidden), that when the Bluetooth is on the screen stays on during a call.. Also, as Brian says here, when I'm on a ride with the "Strava" app running and I receive a call, the screen goes black, but if I press the "back" button, it goes back to Strava ...

My relative is running CyanogenMod 7 on her HTC Incredible. Recently, her phone started acting weird in that when connected in a phone call, pressing the touch tone keypad is not working. You can hear the tone being pressed in the speaker, but the other end of the phone call is not getting the tone transmitted.

Step 1: Open the Settings app. Scroll down and tap on System. Step 2: ... The issue where the screen doesn't turn off or on during calls on your Android phone should now be fixed. 9. Visit a ...

It says I am still talking & the counter is going. Sometimes I get it is still dialing. I have to go into my phone & turn off the bluetooth for it to disconnect the call. This all started as soon as I did an update on my Galaxy Ultra S21 on May 2022. I paired my son's phone & it also does not work & he has the Pixel phone.

The BT phone connection while on a call will keep the radio powered on even with the ignition off and the door open until you transfer the call to the handset. It's a setting in the ...

Up to \$9 cash back! My 2021 jeep cherokee radio will not turn off says there is an active phone call. There is no one in the phone I turned blue tooth off ... read more

Solution 4 - Enable Phone calls. Some OEMs also have a toggle to enable or disable phone calls on a particular paired Bluetooth device. Make sure that Phone calls are indeed enabled under that particular device. This is how to ensure that Phone calls are enabled for a Bluetooth device: Open Settings. Choose Bluetooth.

I've experience this problem a few times. The first time it happened, I tried powering off the phone, but when I tapped Power Off, I would need to tap again to turn my phone off. Then it would show nothing. I had the same problem trying to tap Restart. From then on I just decided to wait until the battery dies each time I experience this.

Cannot power off system during active phone call

Unresponsive Screen during phone call on XR during a phone call, my xr screen will go dark, the phone call is still happening, but for example, ... DO NOT release Side Button when invited to Slide Power OFF) See if the above helps. Test the issue again after Force ReStart is done. Axel F. Show more Less. Reply. Link. of 1;

Usually, if an app is frozen, you can still go to the home screen or reboot the phone like normal. However, if the entire phone is stuck, you'll need to try something else. This Is Not a Factory Reset It's important to note that what we're doing here is not a factory reset. A factory reset is when you completely wipe your device of all data and ...

Phone screen doesn't turn off or on during calls. Phone screen doesn't turn off or on during calls. ... There are several reasons why your phone screen may turn on, even if you didn't press the Power key or Side key. Some features that make the phone easier to wake up, may also cause the screen to turn on unexpectedly. ...

OP is posting a completely different thing than screen time out. My phone is on 10 minutes time out but on a call it always powers off the screen after maybe 60 seconds, which is annoying due to all the automated systems that make you listen to like 9 different options before picking one, then you have to turn your phone back on to pick one each time, etc.

some agent when they are going from ready to unready auto during active calls . also this case happens when they are ready and no active calls. be informed this happens to some agents not all,and we set service parameters to let agent ready even after unanswered calls. UCCX v 11.0 . agent DN :7645 . use this below URL to download these logs ...

Instead of ringing your phone, if your calls go straight into voicemail, it is a huge call quality issue. It can happen if the VoIP service providers no longer register your VoIP phone. Your Do Not Disturb (DND) mode may also be active. This call drop is technically due to the current network configuration for call forwarding.

Monitor your network quality during calls using built-in phone graphs and logs. Packet loss is a major culprit for call failures. Use Power over Ethernet ... Effect on VoIP Phone Calls. Your local system security software may also be blocking the RTP media traffic even while allowing the VoIP control traffic to flow normally.

You can see that even though there is an active call - the time of day is in green in the upper-left corner of the screen - this keypad doesn't have a red phone image but a green one. Numbers typed into this keypad during a phone call will not be transmitted as DTMF tones, in other words, your menu choices won't be transmitted.

Again, another simple option to ensure that your customer gets to talk to someone, even if the power's out. If your company or business has more than one location, and assuming they're both using a VoIP phone system, you can forward calls from one location to the other during a power outage. There are some limitations here.

Part 2. Adjust Settings for Phone Calls. If iPhone keypad is not working during phone call, you need to hang

Cannot power off system during active phone call

up the call and do the following remedies. To begin with, it is worth trying to adjust some settings related to ...

When this happens, it is because your phone is using older voice communication methods and systems. Modern voice communication on a cellular network uses VoLTE to communicate. While you are on a VoLTE call, you can use the internet, but if you are not on a VoLTE call, you cannot use the internet.

If you're not sure, click Check Usage / Due Date below to use our automated system. Check Usage / Due Date. If you've recently refilled services, or reactivated your phone, it could take a few minutes for our systems to update. You can try turning Airplane Mode on for a minute and then turning it back off.

Up to\$9cash back· Mechanic"s Assistant chat. Customer: My 2021 jeep cherokee radio will not turn off says there is an active phone call. There is no one in the phone I turned blue tooth off.

Charge your phone or tablet for at least 1 hour using the charging cable that came with it and an appropriate charger can take up to 10 minutes for the charging indicator to appear on the screen if the battery is completely drained, or if you've just gotten a new device.

Ensure that your phone"s Do Not Disturb (DND) feature is turned off. This feature can unintentionally block incoming calls. ... One cause of jitter is when the audio data packets sent during a VoIP call experience drops or congestion in the network"s transit. This disruption can result in the packets arriving at the recipient out of order ...

Does anybody know how to keep the screen from going BLACK during an active phone call ? I tried "Motions and Gestures" toggled "Keep screen on while looking at it" but it still goes black.
