The sun powers our world, and with the right portable solar panel, it can also power your outdoor adventures or home emergency set up. I've tested dozens of models from top brands like Bluetti, Jackery, Anker, Goal Zero, EcoFlow, and BioLite, and have come away impressed with their power generation potential.

In terms of larger 100-watt solar panels, the BigBlue SolarPowa 100 ETFE is the best value around. This model costs significantly less than pretty much every other panel we tested. But that's where the differences stop because this performs almost as well as the more expensive large solar panels.

How much do solar panels cost on average? Most people will need to spend between \$16,500 and \$21,000 for solar panels, with the national average solar installation costing about \$19,000.. Most of the time, you'll see solar system costs listed as the cost per watt of solar installed so you can easily compare prices between quotes for different system sizes.

The best cheap solar panels in 2024 come from LONGi, Canadian Solar, Trina Solar, JA Solar, and Qcells. Our solar experts ranked these panels by value, warranty, module quality, and company financial performance.

The Greccell 100W Portable (60.3 Wh), Allpowers SPo12 100W Panel (59.2 Wh), Dokio 110W 18V Portable Kit (57.6 Wh), and BioLite Solar Panel 100 (53.6 Wh) also performed well in our direct sunlight solar generation tests. While these panels didn't perform quite as well as the top performers, they still generated a high amount of charge over one hour.

If you're looking to buy cheap solar panels, we recommend looking at options from Q Cells and LONGi, in particular. These are both tier-one panel manufacturers that offer low prices, solid warranty coverage and above-average efficiency ratings for their products.
