How to install a CPS inverter?

290.0 (11.4in.) 1. Hang the inverter onto the mounting bracket as shown in Figure 3-6; Manual mounting: One person can safely lift the inverter and mount it onto the bracket. The main enclosure of the CPS inverters is 22kg (48.5 pounds). 2. Install the wire-box: Remove screws securing the bulkhead cover at the top of the wire-box.

How to connect a PV module to a DC inverter?

PV modules generate electric energy when exposed to sunlight and can create an electrical shock hazard. Therefore, when connecting the PV modules, shield them with opaque cloth. Before connecting DC input power cables, ensure that the voltage on the DC side is within the safe range and that the DC SWITCH on the inverter is OFF.

What is a photovoltaic (PV) inverter user manual?

This user manual is intended for photovoltaic (PV) inverter operating personnel and qualified electrical technicians. This user manual is subject to change (specific please in kind prevail) without prior notice. Indicates an imminently hazardous situation which, if not correctly followed, will result in serious injury or death.

What are the requirements for a PV module?

PV modules connected in series in each PV string must be of the same specifications. The maximum open-circuit voltage of each PV string must be always lower than or equal to its permitted range. The maximum short circuit current of each PV string must be always lower than or equal to its permitted range.

This Installation and Operation manual contains important information, safety guidelines, detailed planning and setup information for installation, as well as information about configuring, operating and troubleshooting the CPS ...
