

Connecting renogy solar panel to goal zero yeti

Can I use a renogy solar panel with a goal zero Yeti?

Since the non-lithium Yetis have higher maximum voltages, you can use a panel like the Renogy 160W and Renogy 175W Flexible with a MC4 to 8mm cable adapter. When connecting two or more solar panels to a Goal Zero Yeti, the Vmp rating is as important as with just one panel. If your Yeti can only handle 22V, you need to wire your panels in parallel.

Can I use the same solar panels with Goal Zero Yeti 200X and 500X?

The Goal Zero Yeti 200X and 500X are two new power stations from Goal Zero. Both of them have an 8mm input, so even though the charge controllers are slightly different on the inside, you can use the same panels with both. Related Post: What you need to think about when connecting solar panels to these power stations is to not exceed 22V Vmp.

Does a third-party solar panel work with Goal Zero Yeti lithium power stations?

Note that the positive from your solar panel should always go into the positive red wire on the adapter, or you have the wrong cable. The red piece of the Anderson Power Pole should then always go into the red Anderson part on the Yeti. Let's talk about what makes a third-party solar panel compatible with the Goal Zero Yeti Lithium power stations.

Is it safe to use a renogy suitcase with a Yeti?

As you can see on the sticker on my Renogy suitcase panel, the Vmp rating is 18V, which makes it safe to use with my Yeti. [How Do I Chain Several Solar Panels Together To A Goal Zero Yeti?](#)
