

# Constellations in the sky right now

Which constellation dominates the night sky?

The Great Square of Pegasus, the most prominent feature of Pegasus, dominates the evening sky. The other three constellations are less conspicuous and can be found using the four stars of the Great Square. Pisces, the 14th largest constellation in the sky, occupies the area east and south of the Great Square.

What constellations are in the sky in astrology?

Pisces, the 14th largest constellation in the sky, appears in the northeast. The head of the western fish is high in the sky, while the eastern fish is close to the horizon around 10 pm. The smaller Aries (the Ram) and Triangulum (the Triangle) appear above the northeastern horizon.

Which constellation rises in the east?

Cetus (the Sea Monster) and Eridanus (the River) are the largest constellations rising in the east. Cetus is the fourth largest of the 88 modern constellations. Its brightest star, Diphda, is found along the imaginary line extended from Alpheratz through Algenib in the Great Square of Pegasus.

Which constellations appear above the southern horizon in the night?

The brightest constellations appearing above the southern horizon in the evening are Carina (the Keel), Crux (the Southern Cross), and Centaurus (the Centaur). These three constellations are circumpolar in the southern hemisphere. They can be seen throughout the year for at least part of the night.

What constellations are in the Summer Triangle?

The constellations of the Summer Triangle - Cygnus (the Swan), Aquila (the Eagle) and Lyra (the Lyre) - appear in the northwestern sky, and the bright Perseus and Auriga (the Charioteer) dominate the northeastern sky. The faint Lacerta (the Lizard) is visible between Cassiopeia and Cygnus.

What constellations are high overhead in the evening?

For observers in the southern hemisphere, the zodiac constellations Aquarius (the Water Bearer) and Capricornus (the Sea Goat) are high overhead in the evening, as are the four constellations known as the Southern Birds: Phoenix, Grus (the Crane), Tucana (the Toucan), and Pavo (the Peacock).
