

Dassault systemes power by

Dassault Systèmes SE (French pronunciation: [daso sistem]) (abbreviated 3DS) is a French multinational software corporation which develops software for 3D product design, simulation, manufacturing and other 3D related products. Founded in 1981, it is headquartered in Vélizy-Villacoublay, France, and has 23,811 employees across 194 global offices.

Explore Dassault Systèmes' products designed to enhance sustainable innovation across industries. From 3D design, simulation & manufacturing to virtual universes, discover how our solutions can empower your business.

Collaboration on the 3D EXPERIENCE platform is enabled for the SOLIDWORKS users with the PowerBy functionality. This allows SOLIDWORKS customers to leverage large range of 3D EXPERIENCE apps and harness the power of a full-fledged 3D EXPERIENCE platform while continuing to design in SOLIDWORKS

Infrastructure, Energy and Materials businesses, including transportation & civil infrastructure, power, oil & gas, mining, metals and minerals, and chemicals face many challenges. Environmental concerns and increasing public scrutiny drive rising interest in.

In the Dassault Systèmes world, there is a lot of buzz around POWERBY, but little data on what exactly that means. This post is intended to shed some light on POWERBY and hopefully help...

A PowerBy solution is the vital link that connects your native software to the 3DEXPERIENCE Platform. It is a "role" that allows you to save your SOLIDWORKS and CATIA files on the...

This means PowerBy can be used with Dassault Systèmes' "On-Cloud" version of the 3DEXPERIENCE platform, so CATIA V5 users can now benefit from the most comprehensive cloud-based PLM offering on the market, with near-instant deployment time and

Building on the theme of sharing and collaboration digitally, I would like to introduce our GEOVIA community to GEOVIA POWERBY, a set of rich applications leveraging the power of a social and collaborative enterprise-level platform.
