

District New Energy Solar Support

Why should you install solar panels in Blaby district?

Supporting our community to install solar panels will help to achieve this by reducing reliance on grid electricity and reducing carbon emissions. Generating free renewable electricity also means lower energy bills. We have partnered with independent experts in group-buying, iChoosr Ltd, to bring this opportunity to Blaby District's homeowners.

How will a new Solar System benefit the Council?

The new solar system also includes a 130kWh battery storage unit which will increase the council's ability to use renewable energy beyond when the sun is shining and allow the Council to charge up overnight on cheap off-peak electricity from the grid.

Can I get a grant to install a solar energy system?

Subject to eligibility, grants can be used to install a range of measures, including: renewable energy options such as solar PV and air source heat pumps. If you privately own or rent an inefficient property you could qualify for financial support.

How can community energy help the UK reach net zero?

With support from Energy Saving Trust, communities across the UK have been turning their projects into reality. The benefits include reducing emissions and helping the UK reach net zero by 2050. Community energy has huge potential in reducing our emissions and helping us reach net zero.

When will Trinity Road solar panels be installed?

The Trinity Road installation, which incorporates a mix of the commonly used 'hook and rail' system, whereby solar panels are anchored externally to the existing roof, and integrated in-roof panels which replace existing roof tiles and provide additional strength, is expected to be completed by early August.

What is the solar together Leicestershire 2022 scheme?

The Solar Together Leicestershire 2022 scheme is now closed to new registrations. We are committed to achieving net zero as an organisation by 2030 and to supporting the district in becoming net zero by 2050.
