Can Cotswold residents install solar panels on their homes?

Cotswold District Council has teamed up with MakeMyHouseGreen (MMHG) in a national first for a local authority, to help Cotswold residents make the move to install solar panels on their homes.

What is the Cotswold home solar scheme?

The Cotswold Home Solar scheme aims to give householders thinking about solar technology greater confidence and understanding when weighing up the options, with no sales pressure. Councillor Mike McKeown, Cabinet Member for Climate Change and Sustainability at Cotswold District Council, said: "Purchasing solar panels can be daunting for some.

Will solar help Cotswold residents save money?

"Currently around 5% of Cotswold homes generate electricity through solar panels. Demand is growing, and we'd love to see solar make a much bigger contribution to the district's energy. We're hoping this scheme will help residents take action to contribute to a greener future and save money on their household bills in the long run.

What is the Essex County Council solar together scheme?

The Essex County Council (ECC) scheme helps buyers through the process of purchasing high quality solar panels, offering lower prices than the open market and pairing up residents with trusted suppliers. Solar Together Essex helps residents to save money on both installation and future energy bills. Join the scheme

Should you buy rooftop solar panels in Cotswold?

Councillor Mike McKeown, Cabinet Member for Climate Change and Sustainability at Cotswold District Council, said: "Purchasing solar panels can be daunting for some. Cotswold Home Solar will give homeowners who want to invest in rooftop solar panels greater confidence in the credibility and cost-effectiveness of what's on offer.

Can a community-owned rooftop solar system be ethically sourced?

Efforts to do this have been made by councils like Kensington & Chelsea and Fenland District Council in its Fenland for Business scheme. The Big Solar Co-op is an excellent example of how it is possible to implement community-owned and ethically sourced rooftop solar at the national scale.
