

# Dominion virginia power solar program

Frequently asked questions about Dominion Energy's Green Power program to advance renewable energy in Virginia. Skip to Content. ... In 2011 the program supported 20 small solar generators throughout Virginia; in 2012 our support of small solar continued, in addition to adding even more Virginia-based biomass. ...

Community Solar will be available in Virginia in 2023. Dominion Energy has several Green Energy programs to consider if rooftop solar isn't right for you. ... Solar power has been rapidly growing across the states and worldwide, which has also led to the growth and proliferation of other green projects, such as the boom in energy storage ...

The Dominion Green Power program directly supports these solar projects through the purchase and retirement of the RECs produced. The Solar Purchase Program is an alternative to Dominion's net metering program in which customers offset their consumption with self-generated renewable energy using a variety of fuel sources.

Virginia's state legislature formalized a Shared Solar Program in 2020 under section 56-594.3 of the Virginia Code. The shared solar program, which only applies to utility Dominion Energy, limits facility generating capacity to five megawatts with an overall program cap of 150 megawatts. At minimum, 30 percent of subscribers must be low-income.

How does Dominion Energy Virginia net metering work? Dominion Energy customers who have solar panels have the opportunity to enroll in a net metering program. Customers agree to connect their renewable energy system to the power grid so that they always have a steady supply of energy, even when their system is not producing energy.

This program, named Dominion Solar Purchase Program, provided premium payments to solar customers and made the switch much easier and more appealing. 2. Does going solar in Virginia make sense? Due to recent solar incentives, switching to solar energy has become a more sensible investment in the state of Virginia. ...  
-Solar Power Virginia ...

The proposal includes 11 utility-scale solar projects, two small-scale distributed solar projects, one combined solar and storage project, and one stand-alone energy storage project, which will be owned and operated by Dominion Energy Virginia.

The RECs purchased for the Dominion Energy Green Power program are retired on behalf of program participants and are completely separate from any other RECs Dominion Energy Virginia may purchase to achieve Virginia's voluntary Renewable Energy Goal of 15 percent of base year electricity energy sales coming from renewable energy sources by 2025.

# Dominion virginia power solar program

In 2020, Virginia passed laws to create new "shared solar" programs, established new sections in the Virginia Code under § 56-594.3 and § 56-585.1:12. The Shared Solar Program will provides customers of Dominion Energy Virginia ...
