Can I Touch the PV panels when the inverter switch is on?

Do not touch the PV panels or any rail system connected when the inverter switch is ON, unless grounded. **WARNING!** SafeDC complies with IEC60947-3 when installing the system with a worst case SafeDC voltage (under fault conditions) \leq 120V. **CAUTION!** This unit must be operated according to the technical specification datasheet provided with the unit.

How do I Commission the inverter?

Perform the commissioning steps as described in Commissioning the Installation on page 52. 1. Turn OFF the inverter ON/OFF switch, and wait until the LCD indicates that the DC voltage is safe (\leq 50V), or wait five minutes before continuing to the next step.

How do you rate a PV inverter cable?

Cables must be rated, as a minimum, to the voltage and current ratings derived from the PV array. Standard de-rating factors must also be applied (BS 7671). Cables should be sized such that overall voltage drop at stc between the array and the inverter is \leq 3%.
