

Duke energy shared solar program

Does Duke Energy offer 750 megawatts of solar power?

Duke Energy Florida proposes a new program that, if approved, will offer customers about 750 megawatts (MW) of new, cost-effective solar power. This will provide more options for qualified residential, business and local government customers to voluntarily share in the company's solar energy production.

Does Duke Energy Florida offer a solar rebate?

Duke Energy Florida does not offer a solar rebate or incentive program for its customers. However, customers can take advantage of the 30% federal solar tax credit. The Clean Energy Connection program is available for those who cannot or do not wish to install home solar panels and still benefit from solar energy.

Does Duke Energy Florida have solar metering?

Duke Energy Florida offers net metering, which means that customers can receive credit for excess solar energy at the full retail rate of electricity. Duke Energy Florida does not have any solar-specific rebate or incentive programs, but customers can take advantage of the 30% federal solar tax credit.

How much will Duke Energy Invest in New solar power plants?

Duke Energy plans to invest an estimated \$1 billion in new solar power plants across Florida in the next three years. The first plants will go online in 2022 and more will follow through 2024. The investment is part of the Clean Energy Connection Program, which is delivering on what customers want - affordable clean energy options.

Does Duke Energy offer incentives for solar?

Duke Energy does not offer solar incentives or rebate programs for its customers. However, Duke Energy customers can take advantage of the federal solar tax credit if they qualify. The federal tax credit equals 30% of installation costs and directly reduces what you owe in federal income taxes.

What are the benefits of Duke's solar program?

The program is projected to provide an economic benefit of over \$530 million for all Duke's customers. It will additionally expand access to solar for local governments and businesses, schools, and families - including low-income customers. Moreover, the program's 750 MW of clean, renewable solar power will provide cleaner air to local communities.

If approved by the commission, the program will provide Duke Energy Florida customers with about 750 megawatts (MW) of new, cost-effective solar power - offering more options for qualified residential, business and local government customers to share in a slice of the company's solar energy production on a voluntary basis.
