Hellion Power Systems is a turbocharger specialist with one goal - produce and develop the finest bolt-on turbo kits in the industry and back that with outstanding customer service. Since 2004, the company's core business has been building record setting turbo systems and keeping customers at the forefront of turbocharging technology.

Hellion Power Systems fired the first shot in the 2018 Mustang power adder wars by revealing that its Eliminator twin-turbo systems are locked and ready to go when the cars hit the streets. The first such kid will get a public reveal at the SEMA show on a project constructed by Tucci Hot Rods. (Photo Credit: Hellion Power Systems)

To push the sport forward and more closely identify with Hellion Power Systems' street customers, John Urist built this 2016 Mustang up from a wreck into a 2,000-horsepower Street Outlaw racer. Along the way, John founded Hellion Power Systems, which has delivered on the promise of bolt-on turbo kits that are readily available for order. With ...

Hellion has designed a line of powerful small frame turbochargers that feature the latest technology and innovation - all in a compact package. The entire turbocharger package has been developed and designed for increased reliability while improving performance. Constructed from the ground up, these turbos feature all-new quick spool (low drag) ceramic dual ball bearing air ...

HPJ reached out to Hellion Power Systems for assistance, and the longtime turbo system manufacturer delivered. Although they didn't have a system designed specifically for the '20 Shelby cars, owner John Urist had confidence that the HPJ team could take the Hellion Mustang GT Sleeper twin-turbo system and adapt it for GT500 usage.

Hellion's single-turbo kit comes standard with a 62mm turbo and retails for \$4,995, whereas the complete system kit, which includes injectors and a programmer with a base tune, sells for \$5,795.

built this 2016 Mustang up from a wreck into a 2,000-horsepower Street Outlaw racer. Along the way, John ...

In racing circles, turbochargers are often referred to as &quot;snails&quot; due to the spiral shape of the compressor and turbine housings. It's an ironic bit of slang, as there are few upgrades capable of making as much horsepower as a quality turbocharger system. John Urist, five time NMRA Super Street Outlaw Class Champion and owner of Hellion Power Systems, ...
