

Emergency power supply for home

The emergency power supply must have a power rating of at least 1500 watts. It should have voltage, current, and short-circuit protection. If the emergency backup power supports a combination of batteries and solar panels, that would be an added advantage. See how many devices it can power at once.

These systems are complex and expensive to set up, however, and not all homes are in the position to store solar power. Assessing Your Home's Power Needs. Before selecting a backup power system, assess your home's electrical requirements during an outage. This evaluation will help determine the appropriate size and type of backup power.
