

Luckily, the actress stayed close to home with her "showbiz" name. She's actually Emily Jean Stone, rather than Emma Stone. When joining the Screen Actors Guild, she found out her name was already taken. As per the rules of Hollywood, there can only be one. So, the name Emma Stone was born.

Mirza's stone circle refers to prehistoric monuments such as Stonehenge and Nine Ladies, standing stones erected by humans and used for mysterious practices of communion with the Earth. Each of the eight stones in the circle is carved to integrate LED lights and embedded speakers. The ninth stone, the "mother" stone, sits apart, mounted with solar panels that ...

Unlike fossil fuels, solar power is renewable. Solar power is renewable by nature. Sunlight is infinite, and enough solar radiation hits the planet's surface each hour to theoretically fill our global energy needs for nearly a year. No matter how much solar power we use to generate electricity, the sun will continue to shine. It doesn't deplete.

To be considered a serious actor, the way Oscar-winning Emma Stone is, willingness to physically transform for a role is key. Over the years, fans have been regaled with stories of extreme body fluctuations, permanent tattoos, and unshakable accents taking over during filming -- but even knowing Emma Stone's long black hair is for a movie doesn't take ...

Stone had her first panic attack at age 7. She says acting helps with anxiety, because it draws on her "big feelings." She's nominated for an Oscar for Poor Things. Originally broadcast Jan. 31, 2024.
