

With the escalating global demand for sustainable transportation, Fuel Cell Electric Vehicles (FCEVs) have emerged as a prominently researched domain. In light of this development, an ...

On April 29, 2025, a floating power plant operated by T&#252;rkiye's Karpowership began generating electricity using liquefied natural gas (LNG) off the coast of Dakar, Senegal. In collaboration ...

US President Donald Trump has declared his disdain for electric vehicles (EVs) and with sales disappointing, carmakers who invested heavily in battery production could follow General ...

The Akwa Group, a Moroccan energy and oil distribution giant, has announced the launch of an ambitious oil storage project in Bargny-Sendou, approximately 30 kilometres from Dakar, the ...

In light of the anticipated decline in electric vehicle sales following the expiration of U.S. subsidies, LG Energy Solution is pivoting its strategy. The company is set to ramp up production of ...

General Motors (GM) is supplying both used and new electric vehicle batteries to Redwood Materials, which is converting them into stationary energy storage systems, the companies ...

In collaboration with Senegal's national electricity company, Senelec, this marks Africa's first LNG-to-power project, utilizing Karpowership's floating storage and regasification unit (FSRU), ...

Converting electric cars to batteries helps stabilize the power grid. The technology allows idle vehicles to be used to store and release energy. Pilot projects in Europe are exploring these ...

Two Korean companies, S-OIL and Bumhan Unisolution, just signed a pact to work together to further develop energy storage systems (ESS) and electric vehicle battery pack systems using ...

This is directly linked to the demand for improved battery energy densities, leading to the widespread adoption of nickel-rich cathodes in high-performance batteries. Growth Factors: ...

Ce mardi marque une avanc&#233;e d&#233;cisive pour le secteur &#233;nerg&#233;tique du S&#233;n&#233;gal, avec la mise en service officielle de la plus grande centrale &#233;lectrique jamais construite dans le pays.

Electric vehicle (EV) batteries are rechargeable lithium-ion or solid-state systems storing 20-120 kWh to power electric motors. Key applications span cars, buses, e-bikes, and marine vessels. ...

AXIAN Energy has commenced construction of the NEA Kolda project, a large-scale solar and battery storage facility aimed at advancing Senegal's renewable energy objectives. ...

The Trojan T-105 Plus 6V Flooded Battery is a deep-cycle lead-acid battery designed primarily for electric vehicles requiring sustained power delivery, including golf carts, low-speed industrial ...

This paper presents the comprehensive design, simulation, and experimental validation of a grid-tied hybrid renewable energy system tailored for electric vehicle (EV) charging applications.

Senegal's national utility Sociéte nationale d'électricité du Sénégal (Senelec), in partnership with Turkish energy firm Karpowership, have officially launched the country's first LNG-to-power ...

“Google has signed its first partnership with a long-duration energy storage company,” reports Data Center Dynamics. “The tech giant signed a long-term partnership with Energy Dome to ...

Le développeur de projets d'énergies renouvelables en Afrique subsaharienne, Africa REN, a annoncé dans un communiqué du 16 juillet le démarrage de la construction de Walo Storage, une unité de stockage ...
