

45% of Türkiye's electricity was generated from low-carbon sources in 2024, above the global average of 41%. It was the 15th largest country by electricity demand. Türkiye's largest source of clean electricity is hydro (22%). ...

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

The country expects to achieve fully market-oriented development of the power storage industry and independent research and development of core technologies and equipment by 2030. Answering the call, local governments ...

The global Nickel Hydroxycarbonate market is experiencing robust growth, driven by increasing demand from the electric vehicle (EV) battery sector. Nickel Hydroxycarbonate is a crucial ...

By type, Hydropower led with 47% of Turkey's renewable energy market share in 2024, while solar PV is forecast to deliver a 9.2% CAGR through 2030. By application, Utility-scale assets accounted for 69% share of the ...

The sulfide-based solid electrolyte market is experiencing significant growth, driven by the increasing demand for safer and higher-performing batteries in electric vehicles (EVs) and ...

Over the past 42 years, ASPILSAN Enerji has played a significant role in the development of the defense industry and in reducing foreign dependency by utilizing domestic resources to develop and produce battery ...

Sustainability and feasibility of solar-powered cooking stove technology, as a clean energy solution, for the low-income and rural communities in the Global South were discussed in this ...

Our research focuses on enhancing the efficiency, reliability, and sustainability of thermal energy systems. We investigate heat transfer, energy storage, and thermal management solutions for ...

Over the last decade, Turkey has emerged as a significant renewable energy player. As of 2024, about 55% of its installed electricity capacity comes from renewables, including wind, solar, ...

Two projects led by the University of Oxford have received a major funding boost from the Faraday Institution, the UK's flagship institute for electrochemical energy storage research. The funding is part of a £19 million ...

For now, Turkey's energy hub project remains more of a political narrative than a commercial reality. A more realistic path lies in improving domestic energy resilience: diversifying supply ...

This includes the development of bio-based polymers, adhesives, and coatings that can compete with or surpass the performance of their petroleum-derived counterparts. Additionally, there is a growing focus on utilizing carbonyl ...

The  $\leq 100\text{nm}$  Barium Titanate Powder market is experiencing robust growth, driven by increasing demand across diverse sectors. The high dielectric constant and piezoelectric properties of ...

The Battery Energy Storage System (BESS) Market is expected to reach USD 76.69 billion in 2025 and grow at a CAGR of 17.56% to reach USD 172.17 billion by 2030. Contemporary Amperex Technology Co. Ltd. (CATL), ...

The all-iron flow battery market is poised for significant growth, driven by increasing demand for sustainable and long-duration energy storage solutions. While precise market size figures for ...

Solar PV currently constitutes 51.3% of total national renewable power capacity. Credit: Audio und werbung via Shutterstock. Türkiye has one of the world's most rapidly expanding energy ...
