How much money did European energy companies make last year?

The European energy majors' commodity trading divisions last year contributed about \$16.6bn in earnings before interest, tax, depreciation and amortisation at Shell, \$11.5bn at Total and \$8.4bn at BP, according to Bernstein Research estimates of numbers closely guarded by the companies.

Why do we need energy trading?

We want Europe's gas, electricity, carbon and associated markets to function as efficiently as possible so they deliver benefits for the economy, for society and for consumers. Energy trading, within countries and across borders, has delivered greater security of supply, has lowered the cost of energy for consumers and has driven innovation.
