For natural gas alone, 30,000 square kilometers (11,583 square miles) of land is lost to other uses. While solar does use land, it consumes considerably less. In 2015, if all of the land used for natural gas production was instead used for solar energy production, 3 million gigawatt hours could be produced. To summarize, this amount of energy could fulfill 75% of the United States" ...

Secured Solar Loans: A secured loan is a loan that requires the property owner to provide an asset (typically a

Enlighten solar energy

house) as collateral for the money that is being borrowed. Secured loan lenders undertake less risk compared to unsecured lenders. Thus, many secured loans have lower credit score requirements, don't impose prepayment penalties, and the interest paid is tax-deductible.

Enphase is a global energy management technology company that provides residential and commercial solar plus storage solutions. We manufacture solutions spanning solar generation, energy storage, and web-based monitoring and control.

1. Free energy - solar energy is free energy because it comes from Sun. Therefore, you instantly start saving from the first day after installing a solar system. 2.
