What happened to EOS Energy Storage?

Eos Energy Storage survived the competition and spent 12 years building up a technology to rival lithium-ion batteries for storing grid power. Despite similar startups running out of cash and falling by the wayside, Eos plans to leave venture capital behind and enter public markets via a merger with a shell company.

Does EOS have ownership of PG&E?

Eos won a deal in 2015 to supply a 10-megawatt/40-megawatt-hour battery to utility PG&E. Eos also had an early investment in Convergent Energy +Power, which was fully acquired by Energy Capital Partners in 2019. Fisher Brothers, an Eos investor and a privately held real estate firm, was also an early backer of Convergent.

Can EOS Energy Storage rival lithium-ion batteries?

Eos Energy Storage's technology, which has been developed over 12 years, is said to rival lithium-ion batteries for storing grid power. An early project demonstrating market traction is the 300 kW/1,200 kWh installation in New Jersey.

Who is the CFO of Eos?

Eos has several notable board advisers, including former GE CFO Jeff Bornstein and Kevin Walsh, who led the renewables team at GE Energy Financial Services. Mack Treece, who is the CFO of Eos, did not come from GE but successfully developed utility-scale storage as the CEO of Viridity, which was acquired by Ormat Technologies.

Does EOS deserve a \$290 million pre-money valuation?

Eos must convince investors that their intellectual property, factory line, pilot projects, and pipeline of new businesses deserve a pre-money valuation of \$290 million.

Will EOS shave peak demand at a refinery in Athens?

Motor Oil Hellas, a Greek petroleum company, signed a contract for a 1-megawatt/4-megawatt-hour Eos system to help in shaving peak demand at a refinery in Athens. The customer is looking to diversify into sustainable energy and was attracted to the nonflammable nature of the Eos product.

Philippe Bouchard. Bouchard, senior vice president of business development and marketing for Eos Energy Storage, said these are the places where the company thrives. Bouchard said Eos Energy Storage designs battery technologies that operate on regional power grids, storing energy for times when power grids are experiencing the heaviest loads.

NEC Energy Solutions Partners with EOS Energy Storage to bring Revolutionary Energy Storage Product to Market ... Eos has found a powerful new partner to offer complete grid solutions for our Aurora customers worldwide," said Philippe Bouchard, VP of Business Development at Eos. "At a price of

\$160/kWh, the Aurora DC battery system offers ...

The Eos Aurora 2.0 has been installed by Duke Energy as part of a DC-coupled solar + storage system in North Carolina while Eos concurrently deploys its battery as a behind-the-meter solution at the University of California, San Diego in a project funded by the California Energy Commission.

Eos Energy Storage ("Eos") and Northern Power Systems Corp have announced a strategic partnership to develop and offer integrated energy storage systems (ESS) for utilities and commercial and industrial customers. The initiative combines the safe, ultra-low cost Eos Aurora dc battery system with Northern Power's advanced energy storage inverter, controls, and ...

Eos Energy Storage | CREA Energy Innovations Summit October 26th, 2015 Philippe Bouchard, VP Business Development . Partners Drive Product & Business Case Development 2 Eos Genesis collaboration includes: 1. Detailed business case analysis to ...

About Eos Energy Storage. Eos" mission is to deliver energy storage solutions that enable safe, reliable, and affordable electricity for utilities and their customers. ... Eos Energy Storage Philippe Bouchard, 212-628-7191 pbouchard@eosenergystorage or Eco Branding for Eos Energy Storage Jake Rozmaryn, 866 ...

Eos business development and marketing senior vice president Philippe Bouchard said: "We are thrilled to preview our Gen2 solution and distributed manufacturing capability at Solar Power International given that our product is optimally suited for solar + storage applications." Source: Company Press Release

NEC Energy Solutions, a subsidiary of NEC Corp., announced today that it has entered into an agreement with Eos Energy Storage LLC to develop next-generation energy storage solutions based on Eos's Znyt zinc hybrid cathode battery chemistry and its Aurora DC battery system. NEC ES will collaborate with Eos to provide a complete GSS (grid storage solution), which ...

During our conversation, Philippe Bouchard, vice president of business development at the company, laid out the case for zinc battery storage technology in utility applications. As I mentioned earlier, zinc is not as popular as, say, Li-ion for battery storage technology. But Eos Energy Storage is trying to change that narrative.

Eos Energy Storage LLC Philippe Bouchard, 212-628-7191 pbouchard@eosenergystorage . Release Summary. Eos Energy Storage and Con Edison announced a partnership to install and test Eos's ...

power to share and makes the world more open and connected. Philippe Bouchard is on Facebook. ... Worked at Eos Energy Storage. College. No schools to show. High school. No schools to show. Photos . See all photos. Others Named Philippe Bouchard ...

The company was one of a number of long duration storage "contenders" profiled in this feature article from last year. VP of sales Philippe Bouchard told Energy-Storage.news previously that the battery's "sweet spot" is storing energy between 4-8 hours, although it can be decoupled to provide longer durations of up to about 10 hours.

The result, Philippe Bouchard, vice president of business development for Eos Energy, said in a Microgrid Knowledge article, is a storage system "we believe is the lowest-cost battery solution ...

Eos Energy Storage is manufacturer and supplier of the zinc-based Aurora 2.0 battery system for Duke Energy's McAlpine substation and as a behind-the-meter solution at the University of California, San Diego. ... an important step in our journey to help accelerate clean energy while ensuring that it is competitive and reliable," Philippe ...

Philippe Bouchard, of the Edison-based energy company Eos Energy Storage, explained it better. "During (brownouts), portions of grids can be powered down for about four hours at a time," he said. "They do that regularly in places such ...

Philippe Andre Bouchard. AlphaStruxure. ... Previously at Eos Energy Storage, Philippe developed a 240MWh global opportunity pipeline and contracted \$20M backlog for first ever deployment of the Company's novel grid scale battery technology resulting in successful execution of 9 battery storage projects on 4 continents. Philippe supported ...

EDISON, N.J.--(BUSINESS WIRE)--Eos Energy Storage ("Eos") - pioneer of the value enhancing Znyth&#174; battery - today announced a strategic investment from and manufacturing partnership with ...

Eos Energy Storage, the startup that says its zinc-air battery chemistry can provide grid-scale energy storage at unprecedentedly low costs, has just landed its first utility pilot partner to test it out.. That's Consolidated Edison, which announced Wednesday that it's using a \$250,000 NYSERDA state grant to deploy one of Eos's batteries somewhere on New York City's grid.

Eos Energy Storage has raised the first \$15 million of a planned \$25 million in funding, meant to scale up manufacturing of its hybrid zinc cathode, aqueous electrolyte-based battery that could ...

Eos Energy Storage is manufacturer and supplier of the zinc-based Aurora 2.0 battery system for Duke Energy's McAlpine substation and as a behind-the-meter solution at the University of California, San Diego. ... important step in our journey to help accelerate clean energy while ensuring that it is competitive and reliable," Philippe ...

The Eos Aurora 2.0 has been installed by Duke Energy as part of a DC-coupled solar + storage system in North Carolina while Eos concurrently deploys its battery as a behind-the-meter solution ...

Eos Energy Storage is manufacturer and supplier of the zinc-based Aurora 2.0 battery system for Duke Energy's McAlpine substation and as a behind-the-meter solution at the University of California ...

Eos is accelerating the shift to clean energy with zinc-powered energy storage solutions. Safe, simple, durable, flexible, and available, our commercially-proven, U.S.-manufactured battery technology overcomes the limitations of conventional lithium-ion in 3- to 12- hour intraday applications.

Eos Energy Storage business development manager Philippe Bouchard says: "As well as capturing more cheap solar energy for sending to the grid, you also have a dispatchable power plant and are able to maximise its ...

Eos Energy Stack. Image: Eos Energy Storage. Solar PV paired with energy storage at scale could be provided to utilities at just US\$0.10 per kilowatt hour, using advanced battery technology, one manufacturer has claimed. Philippe Bouchard, VP of business development at Eos Energy Storage, which makes its own novel zinc hybrid cathode batteries ...

One company already deploying zinc in the form of a zinc hybrid cathode battery is Eos Energy Storage. Founded in 2008, its "Aurora"-branded zinc cathode battery has a 3-6-hour continuous discharge capability. ... Eos VP for business development Philippe Bouchard says, but "we're plating and re-plating zinc as we charge and discharge ...

A New York microgrid demonstration project will use an energy storage system from Eos Energy that the company describes as the lowest-cost battery storage on the market. ... which is what's needed to compete on the grid," said Philippe Bouchard, vice president of business development for Eos Energy. ... They have a huge amount of load in a ...
