Dont mess with the Trainer Power system... The 3 bladed prop has HORRIBLE performance and the metal engine mount that comes with the engine is very heavy [:(] The Evolution engine are GREAT though, get the .46 NX and put it on a glass mount with an APC prop and you will be happy :) The Evolution starts easily, runs good, and has lots of power !

The Evolution Trainer Power System has been specifically designed with the first time pilot in mind. The engine and special 3-blade propeller have been designed to give your Alpha Trainer the optimum performance for training new RC pilots. The engine is designed for

Prop options for evolution training power system. i am not new to the hobby but it has been a few years since i have flown, i opted for a trainer to brush up on my flying skills, i purchased a hangar 9 alpha rtf trainer, with the trainer power system, which is meant for beginners as it reduces the power for a novice pilot to have more ...

The history of the evolution of electric power system is discussed in this article. First Complete Electric Power System - 1882 The first complete electric power system (comprising a generator, cable, fuse, meter, and loads) was built by ...

In the third decade of the 21st century, electrical power is taken for granted. We plug a hand drill into an outlet, just as confident that the system will supply power at the correct voltage and frequency as the electrician who hooks up a 500-hp dc motor. We don't expect to have to hook up to a different system for every class of power that we need. This is a universal system, similar ...

Included in the package is the JR XF421EX computer radio and Evolution Trainer Power System. ... Hangar 9's new Evolution system incorporates a specially designed, three-bladed prop that provides an excellent climb performance and slower level-flight speeds at high power settings.
