

Extreme Challenge Wiping Photovoltaic Panels

Efficient. Powerful. Reliable. Introducing Solstex [®]. A building-integrated photovoltaic (BIPV) facade system designed to harness the power of the sun, stand up to the harshest of climates, ...

Keeping your solar panels free of dirt, dust and grimy build-up doesn't just make them look nice to the neighbours. Clean solar panels let in more light and create more electricity, just like a clean window lets in more ...

The challenge with BIPV design is that meeting architectural design objectives is sometimes in conflict with PV design requirements for maximum energy output. For example, ...

Several European projects launched last year to unlock this value by extracting high-purity materials from dead PV panels. Backed by EUR8.4 million in EU funding, the Photorama consortium will build an automated pilot facility to ...

The imperative shift towards achieving "zero carbon" emissions has propelled a transformative wave within the energy sector, catalyzing the development of innovative systems centered ...
