

Florida solar energy center

What is the Florida Solar Energy Center?

The Florida Solar Energy Center (FSEC) was created by the Florida Legislature in 1975 to serve as the state's energy research institute. The main responsibilities of the center are to conduct research, test and certify solar systems and develop education programs.

Where can I find information about solar energy in Florida?

See Florida law (section 377.705, Florida Statutes) and the Florida Solar Energy Center for more information. Also, see the Solar Rating and Certification Corporation (SRCC) website.

Does Florida require solar equipment certification?

Florida law (section 377.705, FS) require that all solar systems manufactured or sold in the state of Florida comply with Solar Equipment Standards promulgated by the Florida Solar Energy Center (FSEC). The solar certification and testing standards cover both solar thermal equipment and solar electric equipment.

Who is the Solar Energy Center?

Registered with the IRS as a 501 (c) (6) non-profit organization, the Center is administered by a Board of Directors made up of individuals with wide experience and training in solar energy and other renewable energy resources.

FSEC Energy Research Center, also known as the Florida Solar Energy Center (FSEC), is the state's premier energy research center. Created by the Florida Legislature in 1975 to test and certify solar systems, FSEC is administered by the University of Central Florida.

Laboratory Testing of Reflectance Properties of Roofing Materials, FSEC-CR-670-93, Florida Solar Energy Center, Cape Canaveral, FL. Figure 23. Solar reflectivities of roofing materials. Past research has indicated substantial energy savings associated with white roofs. After re-surfacing the gray modified bitumen roof of one of the classroom ...

She is currently a member of the Stakeholders Council of Enterprise Florida and serves on the Policy Advisory Board for the Florida Solar Energy Center. She holds a Bachelor of Arts in Journalism from the University of Georgia and a Masters of Business Administration from Florida State University.

The Florida Solar Energy Center (FSEC) offers a wide range of courses covering renewable energy and building energy technology topics. Most courses include both classroom instruction and hands-on field experience. In many cases, attendees can receive continuing education units (CEUs) and some courses are approved for Florida professional ...

Florida solar energy center

Solar Matters I is a solar energy science unit developed by FSEC for elementary students in grades Kindergarten through 2nd.: Solar Matters II is a solar energy science unit developed by FSEC for elementary students in grades 3 through 5.: Solar Matters III is FSEC's award winning solar energy science unit for intermediate 6th through 8th grade teachers and students.

When considering solar generated electricity, almost everyone talks about PV-electrolysis. The process works. In fact, it was first demonstrated at the Florida Solar Energy Center in 1983 under funding through the NASA Kennedy Space Center. Though technologically doable, it is not economically viable yet.

The Florida Solar Energy Center has measured the temperatures of roof shingles above attic radiant barriers on hot, sunny summer days. Depending on the color of the shingles, their peak temperatures are only 2-5°F higher than the temperature of shingles under the same conditions without a radiant barrier.

The Florida Solar Energy Center is required by Section 377.705 of the Florida Statutes to develop standards and certify all solar energy equipment manufactured or sold in Florida. To meet the requirements of the Florida Statutes, FSEC has developed a PV ...

The story begins with the energy crisis of 1973 and ends with the Florida Solar Energy Center's 30 th anniversary. Reflecting back on the Center's 30-year history begins with a look at the "70s, when it all began. Started by the Florida Energy Committee and the Florida State Legislature in 1974, we were the first, and remains the premiere ...

The SunSmart E-Shelter Program, coordinated by UCF's Florida Solar Energy Center, has installed more than 115, 10-kW photovoltaic systems on emergency shelter schools throughout Florida. This ambitious program brought together school administrators, code officials, teachers and students, solar industry professionals, researchers, and emergency ...

In addition, the Laws of Florida (377.705, FS) require that all solar systems manufactured or sold in the state of Florida comply with Solar Equipment Standards promulgated by the Florida Solar Energy Center (FSEC). These standards cover both solar thermal equipment and solar electric equipment.

The Florida Solar Energy Center has revised the FSEC Standards for solar thermal collectors and solar thermal systems. The revisions allow FSEC to accept certifications from the Solar Rating & Certification Corporation(TM) (SRCC) or the International Association of Plumbing and Mechanical Officials (IAPMO). The streamlined certification program ...

Florida solar energy center

321-638-1002 Office: FS 1, Room 208A Biography James M. Fenton is the Director of the UCF Florida Solar Energy Center, where he leads a staff of 90 in the research and development of energy technologies that enhance Florida's and the nation's ...

The Florida Solar Energy Center is a large blue building with red and yellow trim. You will easily be able to see it on your right-hand side across this intersection (see photo at right). Proceed straight through the intersection, move into the right-hand lane, and turn right into the ...

Details of these energy programs follow. Florida Solar Energy Center Dr. James Fenton, Director, 321-638-1002, JFenton@fsec.ucf Mr. Philip Fairey, Deputy Director, 321-638-1005, pfairey@fsec.ucf The Florida Solar Energy Center (FSEC) is the largest and most active state-supported

The Florida Solar Energy Center (FSEC) leads this network. The Florida Solar Energy Center, with more than 30 years of training experience in the solar energy arena, collaborates with its training partners to expand the existing model of its long-standing alternative energy training programs. Activities include:

The Florida Solar Energy Center (FSEC)--a research institute of the University of Central Florida (UCF)--was created by the Florida Legislature in 1975 to serve as the state's energy research institute. The main responsibilities of the center are to conduct research, test and certify solar systems, and develop education programs.

The Solar Energy Department of the Florida Solar Energy Center (FSEC) has been researching photovoltaics (PV) for over 30 years and they know the ins and outs of the technology. This consumer's section has been designed to help you understand how ...

The Florida Solar Energy Center's (FSEC) building science program was founded to research and develop building improvement strategies that reduce energy use, enhance the economy, and improve the environment; and to educate the public, students, industry and practitioners on ...

Photovoltaic System Certification Support: Email: pvsystem@fsec.ucf CERTIFICATION The 2017 Florida Legislature, through HB 1021, amended the Solar Energy Standards Act of 1976 that governs the certification of solar energy systems manufactured or sold in Florida.
