GAMA Power Systems operations cover a combined package of engineering, procurement, construction, commissioning, start-up, warranty and spare parts services providing our customers with the complete spectrum, enabling a seamless implementation interface for their investments in power sector for almost all types of power plants.

This case study is for Gama Power Systems Engineering and Contracting Inc., and two factors influenced this selection: 1. The Russian energy industry has had significant market and competitive environment shifts over the last five years (shifts in macro/micro environmental forces and strategy formulation to predict the future).

I'm not a slide deck artist - Gamma makes it super easy for me to convert my documents into engaging presentations for company all hands, and takes me 10x less time than fiddling about with pixels on slides. Such a time saver. Amelia, Co-founder & CEO at Honeycomb.

The Gamatronic 1U DC+ power system provides clean DC power to sensitive equipment while simultaneously charging the battery bank, and supplying backup power during mains failure. The 1U DC+ contains a 19" 1 U subrack that can house up to 3 hot-plugged rectifiers, or 2 rectifiers + controller and an LVD device.

Gamma allows me to package up information in ways I can't with slides,while still creating good flow for my presentations. Ann Marie, Director of Product at Koalafi. Open the door to a new universe More visual than a
