The videos on how to install the Garmin BC 30 backup camera never once mentioned that you needed the Garmin 010-12242-22 Power cable in order for the backup camera to work! I even called Garmin support and the tech suggested it was because the camera was faulty! Not once did he ask me if I had the BC-30 Garmin plugged into the power cable!

Modern high-end cars have backup cameras built right into their backs. Reversing a car easy for seasoned drivers. But there are times that accidents may still occur when backing your car up even if you are an experienced driver. You may hit a dog, cat, or a pedestrian if they are in your car's blind... Garmin BC 30. While both the BC 30 and BC 35 are wireless backup cameras, they connect in two different

Garmin bc 30 wireless backup camera vehicle power cable

ways. The Garmin BC 30 connects to a satellite navigation display via the traditional 2.4GHz radio frequency.

Mounted this on the back of my 32 foot camper. Used their 50 foot extension cable and mounted the transmitter on the front of the camper. It takes a couple of seconds for the GPS to switch to the backup camera, but after my 3 and 1/2 week vacation that we just got back from, and about 3000 miles, this thing saved my butt several times.

Product Description. Brand new, genuine Garmin BC(TM) 30 Wireless Backup Camera. This is a factory original equipment item, not aftermarket. A quality backup camera like the Garmin BC 30 can significantly enhance rearward visibility for drivers and, thus, help minimize the risk of "blind zone" accidents whenever your vehicle is moving in reverse.
